Manual for Undertaking National Urban Assessments Asian Development Bank, 2016-11-01 Urbanization in Asia is expected to reach 55% by 2030 and 64% by 2050 to constitute 53% of the world's urban population and contribute half the world's gross domestic product. But as cities swell they also struggle with environmental degradation, traffic congestion, inadequate urban infrastructure and lack of basic civic services. This manual prepared by Urban Sector Group of the Asian Development Bank (ADB) provides guidelines for conducting rapid urban assessments. It is guided by the Urban Operational Plan 2012-2020 which outlines ADB's support to its members in developing their urban economies through the 3E approach: Economy, Environment and Equity. It presents a framework providing a context for the city-level 3E tool kits: Tool Kit for Rapid Economic Assessment, Planning and Development of Cities in Asia, Green City Development Tool Kit and Enabling Inclusive Cities Tool Kit for Inclusive Urban Development.

Tools and Methods for Pollution Prevention Subhas K. Sikdar, Urmila Diwekar, 1999-08-31 Tools are needed to define, measure and assess pollution in processes and products to direct and measure improvements in designing cleaner processes and products and to design benign processes and products. Life cycle assessment, process simulation and integration, material substitution and environmental impact assessment are some of these tools. Advances have been made recently in incorporating environmental criteria in process and product design, some renditions of which are commercially available. This is the first compilation of methods, tools and models that can be used to design products and manufacturing processes that prevent pollution from occurring in the first place rather than treating the wastes after they are formed. There is also a critique of social barriers to pollution prevention. Readership: Scientists and advisors in academia, government and industry engaged in encouraging, enforcing, developing and/or implementing cleaner processes and products.
