The Struggle Over Work Shaun Wilson, 2004-07-31

The future of work in advanced industrial democracies is the subject of intense debate and public concern. Despite predictions that working hours would fall and leisure time would rise as society progressed, the opposite has in fact occurred. This new book contains a twofold investigation into the end of work with theoretical and policy angles contributing to the growing research field on the boundaries of economics and sociology.

The Future of Social Security Policy Ailsa

McKay, 2005-07-25. Current debates concerning the future of social security provision in advanced capitalist states have raised the issue of a citizen's basic income (CBI) as a possible reform package. A proposal based on the principles of individuality, universality, and unconditionality which would ensure a minimum income guaranteed for all members of society. Implementing a CBI would consequently entail radical reform of existing patterns of welfare delivery and would bring into question the institutionalized relationship between work and welfare. Ailsa McKay's book makes a unique and positive contribution to the CBI literature by examining the proposal from a feminist economics perspective. Gender concerns are central to any debate on the future of social security policy in that state intervention in the field of income redistribution has differential impacts on men and women. By drawing attention to the potential a CBI has in promoting equal rights of freedom for men and women, this book serves to open up the debate to incorporate a more realistic and inclusive vision of the nature of modern socio-economic relationships.

Housing Vouchers E. Jay

Howenstine, 2017-09-04. Outside the United States, the idea of a consumer housing subsidy is a highly developed concept. Housing allowances, shelter allowances, rent allowances, or rent rebates, as they are called, have been paid out on a larger scale for longer periods of time on an entitlement basis with a much greater variety of rationales than in the United States. As the United States moves ahead with its demonstration program, it is timely to examine and evaluate foreign experiences with the consumer housing approach. E. Jay Howenstine addresses common questions that have puzzled many policymakers: How do consumer housing subsidies work? For tenants? Homeowners? Builders? And government officials? Gathered here is the definitive experience of the countries that have employed them. From Australia to the United Kingdom, here is the reality gleaned from a dozen countries and brought to bear on the United States. Both the virtues and the limitations of the approach are presented in detail for everyone interested in housing. This study is divided

into three major parts First Howenstine reviews the historical background and analyzes housing allowance strategies that foreign governments have adopted A second part examines in detail the major principles and elements with which governments have fashioned their systems The third part examines the impact of housing allowance systems and weighs them in the light of the original objectives Conclusions are also drawn about foreign experiences Should financial assistance to low income families be in the form of consumer housing subsidies or producer housing subsidies or some synthesis of the two systems Should the housing allowance be maintained as a separate housing policy or should it be integrated into a general income maintenance policy This book addresses an increasingly prominent portion of the housing market

Instead of the Dole Hermione Parker,2018-06-28 This book first published in 1989 assesses the existing tax and benefit systems as being beyond repair and examines the case for integration Integrated tax benefit systems change the basis of entitlement from contribution record and contingency to citizenship and need Having shown that full integration is not realistic the author discusses four major partial integration options in detail Basing her comparison on detailed analysis of specific models she is able to compare the redistributive and incentive efforts of each scheme
