The Orchard Children:

The Orchard Children Rachel Maddux, 1978-05-01 The Orchard Children's Treasury Mandy Suhr, 1997 The Orchard Children's Treasury comprises a variety of stories and poems both traditional and contemporary spanning the breadth of the highly acclaimed Orchard list **Latin American Transnational Children and Youth** Victoria Derr, Yolanda Corona, 2020-12-29 Latin American Transnational Children and Youth focuses on understanding young people's connection to nature and place within a transnational and Latin American context. It serves to diversify, elaborate, and sometimes challenge the assumptions made in researching people and place and unearths the complexities of a world in which the identity of many is not shaped by a single place or culture but instead by complex interactions among these. Spanning across ages and geographies, the book explores the central themes of sense of place, identity, and environmental action with an emphasis on Latinx and Indigenous communities. This book balances theoretical questions with geographically contextual empirical research. Each section is situated in current interdisciplinary research and provides geographically specific examples of children and youth's perspectives on place, relations, migration, transnationalism, and an emerging demographic of environmentalists. Contributors from Latin America and the United States advance the fields of childhood and youth studies, environmental psychology, geography, sociology, planning, and education. This book looks across the Americas to see how young people experience their worlds and constructively contribute to their places and environments Dependent and Delinquent Children in North Dakota and South Dakota United States. Committee on standards of prenatal care, 1926 **Curriculum and Practice for Children's Contextualized Learning** Li Jilin, 2017-11-11 Based on the authors' over 30 years of practical research experience, this book shows how situation curriculum design illustrates the new idea of combining subject curricula with children's activities. Particular attention is given to the subject curriculum, activity curriculum, and the optimization of the situation. The curriculum is the most important vehicle of children's learning, and the primary school curriculum is vital to children's growth. Drawing on detailed case studies, the book highlights how situation curriculum design is currently affecting traditional Chinese primary schools **Publications of the Children's Bureau** United States. Pocahontas **Assessing Children'S Mathematical Knowledge** Cooper, Barry,Dunne, Mairead,1999-12-01 this work is highly relevant to the proliferation of accountability measures worldwide James Scheurich and Douglas Foley In many countries the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects In England the majority of the items in such tests have set mathematical tasks in every day situations such as shopping This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem solving Some children are likely to have a better feel for this game than others Assessing Children s Mathematical Knowledge draws on the analysis of national curriculum test data from more than 600 children of 10 11 and 13 14 years of age as well as in depth interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children experience with realistic items The book shows by comparing test and interview data that many children as a consequence of their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and understanding that they actually possess The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds and across the sexes The book will be of interest to academics and teachers studying for advanced degrees in mathematics education sociology of education and educational assessment
