The Ordeal Of Unity The Politics Of European Integration Since 1945:

The EC, Eastern Europe and European Unity Peter van Ham, 2016-10-06 This text argues that the process of West European integration was encouraged and facilitated by the Cold War in which the threat posed by the Soviet Union temporarily inhibited internal conflicts and in which American hegemony provided the relatively stable and secure economic political and military framework in which the major West European countries were able to co operate and take major steps towards the ultimate ideal of a European Union

The Community of Europe Derek W. Urwin, 2014-09-19 This hugely successful history of political and economic integration in Western Europe since the Second World War and especially but by no means exclusively the European Community itself was first published in 1991 to general acclaim Since then much turbulent water has flowed under the bridges of Maastricht and Strasbourg Now in this welcome Second Edition Derek Urwin has brought the story fully up to date with an account of developments since 1991 and an assessment of the mood and prospects of Europe and the Community today

Studies in Economic and Social History Michael Oliver, 2017-11-01 This title was first published in 2002 There are few students of European economic history who will not have come across the writings of Derek H Aldcroft His contributions to the field of economic and social history are vast and distinguish him as one of the most prolific economic historians of the 20th century This volume honours Derek s contribution to the literature of economic and social history and its contents reflect his wide ranging interests particularly on issues relating to transport history and the growth and structural change in economies From transport in the Industrial Revolution to late 20th century international financial architecture the essays in this book contributed by leading economic historians are a tribute to a remarkable scholar

Self-Organization of Complex Structures Frank Schweitzer, 1997-07-16 During the past twenty years a broad spectrum of theories and methods have been developed in physics chemistry and molecular biology to explain structure formation in complex systems These methods have been applied to many different fields such as economics sociology and town planning and this book reflects the interdisciplinary nature of complexity and self organisation The main focus is on the emergence of collective phenomena from individual or microscopic interactions Presents a wide ranging overview from fundamental aspects of the evolution of complexity to applications in biology ecology sociology economics and urban structure formation

Themes in Modern European History Since 1945 Rosemary Wakeman, 2003 Twelve chapters consider the key political cultural and economic changes of post 1945 Europe

The Concept of Treaty in International Law Jan Klabbers, 2023-09-25 Whether or not a certain norm is legally binding upon international actors may often depend on whether or not the instrument which contains the norm is to be regarded as a treaty In this study the author argues that instruments which contain commitments are ex hypothesi treaties In doing so he challenges popular notions proclaiming the existence of morally and politically binding agreements and so called soft law Such notions Klabbers argues are internally inconsistent and founded upon untenable presumptions Moreover they find little support in the pertinent

decisions of municipal and international courts and tribunals The book addresses issues of importance not only for academics working in international law constitutional law and political science but also for practitioners involved in the making implementation and enforcement of international agreements *The Intergovernmental Conference on Political Union* Finn Laursen, Sophie Vanhoonacker, 2023-12-11 The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process and in December 1990 two Intergovernmental Conferences were inaugurated focusing respectively on the development of an Economic and Monetary Union and a Political Union It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process into one coherent set of amendments to the Treaties forming the European Communities This publication examines the positions which the different Member States the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion namely the development of a Common Foreign and Security Policy CFSP The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the negotiations The concluding chapter presents a general framework for better understanding of the course and results of the negotiations and a critical evaluation of the outcome The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference **The Ordeal of Unity** Max Jansen, Johan K. De Vree, 1988 *The Netherlands and the Oil Crisis* Duco Hellema, 2025-10-01 The Netherlands played a remarkable role during the October War and the oil crisis of 1973 In secret the Dutch government sent a substantial amount of ammunition and spare parts to Israel The Dutch supported Israel also politically Within the EC they vetoed a more pro Arab policy The Arab oil producing countries punished The Netherlands by imposing an oil embargo The embargo against the Netherlands was intimidating The Netherlands was dependent on Arab oil The embargo seemed to threaten the Dutch position in the international oil sector The government introduced several measures to reduce oil consumption However within two months it became clear that oil continued to arrive in Rotterdam There was in fact no oil shortage in the Netherlands The Netherlands even profited from the oil crisis The energy situation in The Netherlands was much better than in other West European countries The Dutch therefore rejected French plans for a more interventionist energy policy Atlanticism and liberalism were the key words of the Dutch policy during the oil crisis This book is the result of intensive research in all relevant Dutch archives The authors had free access to all the files they wanted to see They also used resources from other countries involved Many politicians were interviewed The result is a surprising analysis of the oil crisis of 1973 and of the Dutch role in particular *Western Europe and Germany* Clemens Wurm, 1995-03 This book aims to broaden readers understanding of the issues now facing the European Union by explaining the motivation underpinning the

process of integration in Western Europe after 1945 The contributors discuss the part played by the Federal Republic of Germany the role of ideas and political movements in stimulating policy the economic interest of West Germany and West German business and the strategic aspects of Germany's policy Also included is a German view of French and British attitudes toward a unified Europe and a discussion of the social history of integration

The European Economy

Christopher M. Dent, 2002-09-11 The shape of the world economy is changing Globalisation and regionalism have led to the development of powerful but interdependent economic blocs Much economic potential has shifted from the Atlantic to the Pacific area In view of this The European Economy argues that economists need a broader worldwide base of information if these processes and their effect on Europe are to be fully understood Topics discussed include Europe's experience of the growing trend of regionalism the single market plans for economic union EU enlargement Europe's triad rivals EU external trade and trade relations technology and innovation environmental issues This fresh approach highlights the issues which will challenge European countries into the twenty first century

Environment and the Nation State

Duncan Liefferink, 1996 With the European Union's increasing powers its environmental legislation has grown rapidly This study investigates the dynamics of the Europeanization of environmental policy and concludes that the domestic environmental policies of relatively green member States are actually hardly affected The text focuses on policy making in the field of air pollution and acidification between the former European Community and one Member State the Netherlands Included in the text is a concise history of EC environmental policy an explanation of the theories of sovereignty European integration and power dependence and final commentary on the future of environmental policy in the European Union

Jahrbuch zur Staats- und Verwaltungswissenschaft, 1992

The Struggle for the Organization of Europe R. H. Lieshout, 1999 This book offers a new view suggesting that European integration has been driven by political rather than economic considerations The author makes it clear that from the end of the Second World War any plan of economic or monetary cooperation in Europe was almost exclusively motivated by politics He argues that the very foundation of the organization of Western Europe was based on preventing further conflict between France and the newly partitioned Germany Specifically Robert Lieshout analyzes the initial stages of European cooperation between 1947 and 1957 He demonstrates that European institutions usually associated with economic integration such as the European Economic Community were actually laid to achieve the political aim of reconciliation between France and Germany The fact that the very reasons for establishing a more formal organization of Europe have changed i.e. the reunification of Germany in 1990 makes for an interesting conclusion on future developments in European integration This book will be warmly welcomed by both academics and students interested in European integration international political economy history international relations European Studies and economics

Between Anarchy and Hierarchy R. H. Lieshout, 1995 *Between Anarchy and Hierarchy* offers a stimulating new perspective on conflict and collaboration in international politics Robert Lieshout's new book shows how decision making

within individual states influences foreign policy and in turn international politics Using a sliding scale between anarchy and hierarchy he shows how each political system can be defined including the distinctly anarchic international system itself By showing the impact which internal decision making processes have on the structure of the international system Professor Lieshout integrates a theory of foreign policy making into a theory of international politics After developing the epistemological foundations of this theory Professor Lieshout applies his principles to results drawn from the use of game theory in international relations examines the role of force in both hierarchical and anarchic systems and shows how the adaptability of collective decision making processes in states influences their behaviour in the international system Between Anarchy and Hierarchy is remarkable both for the use of a general empirical behavioural theory to explain international politics and for integrating theories of bureaucratic decision making into realist theories of international relations It will be of particular interest to international relations specialists as well as economists political scientists and sociologists within the rational choice tradition

The Economics of European Integration Willem Molle, 1994 This is a systematic analysis of economic integration in Europe It is intended for students who are taking courses on European integration and also for those who are professionally involved in aspects of the functioning of the European Union

The Vicissitudes of European Political Cooperation Alfred Pijpers, 1990

The Struggle for European Union by Political Parties and Pressure Groups in Western European Countries 1945-1950 Walter Lipgens, Wilfried Loth, 2019-11-05 No detailed description available for The Struggle for European Union by Political Parties and Pressure Groups in Western European Countries 1945 1950

In Pursuit of Influence Anjo G. Harryvan, 2009 As one of the six founding member states of the European Union the Netherlands has been at the heart of the European integration project from its inception Looking back on the Netherlands role in European cooperation and integration during the 1950s and 1960s Joseph Luns the country's long standing Foreign Minister depicted himself as an exponent of a Dutch vision This vision Luns suggested enabled the country to act as a leading force in Europe thus demonstrating that in specific constellations in international affairs a middle sized or even a small country can play an important role What was this Dutch vision of Europe and was Luns right in ascribing so much importance to it In this book the author sets out to investigate whether under which conditions and by what means the Netherlands has exerted an engineering influence on the economic and institutional architecture of the European Union It sheds fresh light on the policies of the Netherlands and its Benelux partners in the process of making Europe as we know it today Achieving the Common Market may well be considered the ultimate success of contemporary Dutch diplomacy
