**The Origin of Achievement Motivation** Hardeo Ojha,1991      **Handbook of Social and Evaluation Anxiety** H. Leitenberg,2013-11-11 For a long time I have wanted to put together a book about social and evaluation anxiety Social evaluation anxiety seemed to be a stressful part of so many people's everyday experience It also seemed to be a part of so many of the clinical problems that I worked with Common terms that fit under this rubric include fears of rejection humiliation criticism embarrassment ridicule failure and abandonment Examples of social and evaluation anxiety include shyness social inhibition social timidity public speaking anxiety feelings of self-consciousness and awkwardness in social situations test anxiety performance anxiety in sports theater dance or music shame guilt separation anxiety social withdrawal procrastination and fear of job interviews or job evaluations of asking someone out of not making a good impression or of appearing stupid foolish or physically unattractive In its extreme form social anxiety is a behavior disorder in its own right social phobia This involves not only feelings of anxiety but also avoidance and withdrawal from social situations in which scrutiny and negative evaluation are anticipated Social evaluation anxiety also plays a role in other clinical disorders For example people with agoraphobia are afraid of having a panic attack in public in part because they fear making a spectacle of themselves Moreover even their dominant fears of going crazy or having a heart attack seem to reflect a central concern with social abandonment and isolation      Encyclopedia of Applied Psychology Charles Spielberger,2004-09-02 Encompasses topics including aging geropsychology assessment clinical cognitive community counseling educational environmental family industrial organizational health school sports and transportation psychology Each entry provides a clear definition a brief review of the theoretical basis and emphasizes major areas of application

**Academic Motivation of Adolescents** Tim Urdan, Frank Pajares, 2002-09-01 Few academic issues are of greater concern to teachers parents and school administrators than the academic motivation of the adolescents in their care There are good reasons for this concern Students who are academically motivated perform better in school value their schooling are future oriented in their academic pursuits and possess the academic confidence and positive feelings of self worth so necessary to increasing academic achievement Because academically motivated students engage their schoolwork with confidence and interest they are less likely to drop out of school suffer fewer disciplinary problems and prove resilient in the face of setbacks and obstacles It is precisely because academic motivation is so essential to academic achievement that motivation has taken a place along with cognition as one of the most followed lines of inquiry in educational psychology In this volume we are fortunate to gather together some of the most eminent scholars who have written extensively about the academic motivation of adolescents We are fortunate also in that they represent the varied theories and lines of inquiry that currently dominate research in this area In all we believe that in the dozen chapters that comprise this volume the authors provide elegant insights regarding the academic and social motivation of adolescents that will prove of interest to researchers students teachers school administrators parents policymakers and all others who play a pivotal role or are otherwise invested in the lives of

adolescents in today's society. It is our hope that these insights will not only further the conversation on adolescence and education but will serve as the impetus for further research capable of generating the creative ideas, programs, and structures so necessary to better the lives of the young people in our care.

### **On the Psychology of Military Incompetence**

Norman F Dixon, 2016-05-31 A classic study of military leadership uncovering why generals fail The Crimea the Boer War the Somme Tobruk Pearl Harbor the Bay of Pigs these are just some of the milestones in a century of military incompetence of costly mishaps and tragic blunders Are these simple accidents as the bloody fool theory has it or are they inevitable The psychologist Norman F Dixon argues that there is a pattern to inept generalship and he locates this pattern within the very act of creating armies in the first place which in his view produces a levelling down of human capability that encourages the mediocre and limits the gifted In this light successful generals achieve what they do despite the stultifying features of the organization to which they belong On the Psychology of Military Incompetence is at once an original exploration of the battles that have defined the last two centuries of human civilization and an essential guide for the next generation of military leaders
