The Of Space:

Performance and the Politics of Space Erika Fischer-Lichte, Benjamin Wihstutz, 2013 From its very beginnings theatre has been both an art and a public space shared by actors and spectators As a result its entity and history is intimately tied to politics a politics of inclusion and exclusion of distributions and placements of spatial appropriation and utopian concepts This collection examines what is at stake when a theatrical space is created and when a performance takes place it asks under what circumstances the topology of theatre becomes political The book approaches this issue from various angles taking theatre as a cultural paradigm for political dimensions of space in its respective historical context Visiting the political dimensions of theatrical space in both theatre history and contemporary performance the volume responds to the so called spatial turn in cultural and historical studies and questions a politics of aesthetics that is discussed in continental philosophy The book visits different levels and linkages between aesthetic theory and geography art and sociology architecture and political theory and geometry and history shedding new light on theatre politics and space thereby transforming this historically intertwined triad into a transdisciplinary theme The International Politics of Space Michael Sheehan, 2007-10-15 This book examines the interaction of international politics and space using case studies and various theoretical approaches to international relations The Cube of Space Workbook Joy Nur, 2012-04-24 The Cube of Space Workbook seeks to make the Cubea symbol that illuminates the esoteric meaning of the Hebrew alphabet and the Major Arcana of the Tarot more accessible to students of the Qabalah and Tarot As author Joy Nur worked with this symbol she found correspondences with directional attributions in a variety of traditions This workbook is designed to deepen the students understanding of the Tarot Keys and discover practical ways to apply the insights revealed by a study of the structure of the Cube of Space As the cube is a symbol of three dimensional reality and Tarot images are archetypal symbols for human states of consciousness study of this symbol also sheds light on the human condition and the workings of the mind The directional attributions also relate to cycles of life and give clues about the universal desire for a return to the Source of our being and the search for the meaning of life While this workbook is designed to offer readers the opportunity to make their own discoveries Nurs brief commentary on each view of the Cube of Space offers seed ideas for contemplation that come from her own meditative efforts The author presents the book as a useful meditation tool expounding on the teachings of Paul Foster Case The founder of Builders of the Adytum a western mystery school The workbook is well written the author keeps the text understandable and to the point and it comes in a handy and portable format RECOMMENDED by The U S Review of Books The Shape of Space Jeffrey R. Weeks, 2001-12-12 Maintaining the standard of excellence set by the previous edition this textbook covers the basic geometry of two and three dimensional spaces Written by a master expositor leading researcher in the field and MacArthur Fellow it includes experiments to determine the true shape of the universe and contains illustrated examples and engaging exercises that teach mind expanding ideas in an intuitive and informal way

Bridging the gap from geometry to the latest work in observational cosmology the book illustrates the connection between geometry and the behavior of the physical universe and explains how radiation remaining from the big bang may reveal the actual shape of the universe *Demonstratives, Deictic Pointing and the Conceptualization of Space* Holger Diessel, Kenny Coventry, Harmen Gudde, Olga Capirci, 2021-05-19

The Ethnopoetics of Space and Transformation Stuart C. Aitken, 2016-02-17 Change is inevitable we are told A job is lost a couple falls in love children leave home an addict joins Narcotics Anonymous two nations go to war a family member's health deteriorates a baby is born a universal health care bill is voted into law Life comprises events over which we have considerable partial or little or no control The distance between the event and our daily lives suggests a quirky spatial politics Our lives move forward depending upon how events play out in concert with our reactions to them Drawing on nearly three decades of geographic projects that involve ethnographies and interviews with and stories about young people in North and South America Europe and Asia and using the innovative technique of ethnopoetry Aitken examines key life changing events to look at the interconnections between space politics change and emotions Analysing the intricate spatial complexities of these events he explores the emotions that undergird the ways change takes place and the perplexing spatial politics that almost always accompany transformations Aitken positions young people as effective agents of change without romanticizing their political involvement as fantasy and unrealistic dreaming Going further he suggests that it is the emotional palpability of youth engagement and activism that makes it so potent and productive Pulling on the spatial theories of de Certeau Deleuze Massey Agamben Ranci re Zizek and Grosz amongst others Aitken argues that spaces are transformative to the degree that they open the political and he highlights the complexly interwoven political economic social and cultural practices that simultaneously embed and embolden people in places If we think of spaces as events and events encourage change then spaces and people become other through complex relations Taking poetry to be an emotive construction of language Aitken re visualizes contours and arranges people's words and gestures to

The Sacralization of Space and Behavior in the Early Modern World Jennifer Mara DeSilva, 2016-03-09 In the Early Modern period as both reformed and Catholic churches strove to articulate orthodox belief and conduct through texts sermons rituals and images communities grappled frequently with the connection between sacred space and behavior The Sacralization of Space and Behavior in the Early Modern World explores individual and community involvement in the approbation reconfiguration and regulation of sacred spaces and the behavior both animal and human within them The individual's understanding of sacred space and consequently the behavior appropriate within it depended on local need group dynamics and the dissemination of normative expectations While these expectations were defined in a growing body of confessionalizing literature locally and internationally traditional clerical authorities found their decisions contested circumvented or elaborated in order to make room for other stakeholders activities and needs To clearly reveal the efforts of early modern groups to negotiate authority and the transformation of behavior with sacred space this collection

presents examples that allow the deconstruction of these tensions and the exploration of the resulting campaigns within sacred space Based on new archival research the eleven chapters in this collection examine diverse aspects of the campaigns to transform Christian behavior within a variety of types of sacred space and through a spectrum of media These essays give voice to the arguments exhortations and accusations that surrounded the activities taking place in early modern sacred space and reveal much about how people made sense of these transformations
