Organizations and the Media Josef Pallas, Lars Strannegård, Stefan Jonsson, 2014-07-17 The relationship between media and the organizations they cover has changed dramatically in the last few decades which have witnessed a huge expansion of news coverage focusing on different types of organizations and their activities In parallel organizations have dramatically increased their investment in public relations and other media oriented forms of communication Like other societal developments globalization marketization individualization scientification mediatization has become an institutional

force This book analyses the mediatization of contemporary organizations and how individual organizations industry or markets are scrutinized It examines its key influence on the actions of organizations and how it shapes the entire landscape in which the organizations operate What such a perspective provides is the accentuation of the interplay between organizations and different parts of the society as embedded in the media and its logic This will be essential reading for professionals academics and advanced students in organizational studies public relations and media studies **Essential Guide to Qualitative Methods in Organizational Research** Catherine Cassell, Gillian Symon, 2004-05-26 This text covers an array of methods needed for undertaking qualitative data collection analysis It includes 30 chapters each focusing on a specific technique including chapters on traditional methods analysis techniques intervention methods the latest developments in research methods **A Sociology of Journalism in Japan** César Castellvi, 2024-05-07 This book represents an in depth analysis of journalism in Japan during the golden era of the daily press and the gradual introduction of digital technology starting from the mid 1980s to the late 2010s By presenting firsthand testimony from journalists and field notes collected from fieldwork in the newsroom of one of the country s largest newspapers this book provides a unique insight into Japan s highly active yet relatively under institutionalized journalistic profession It also explores the changes experienced by the organizational development of Japanese journalism in response to broader changes in Japanese society such as the emergence of social networks the evolution of reading practices the demographic situation and the new aspirations of the Japanese youth Based on an extensive ethnographic fieldwork carried out by the author over several years this book will be of huge interest to students and scholars of Japanese society journalism and media studies *Response to Disaster* Henry W. Fischer III, 2008-08-21 *Response to Disaster* combines the original research of author Henry W Fischer with the literature used today to describe behavioral and organizational challenges commonly experienced before during and after disasters Actual problems are presented and compared to those often misperceived to occur know as disaster mythology Fisher examines case studies conducted during the post impact and long term recovery periods of major and minor disasters worldwide He asserts that the role of the mass media assists in eliciting needed help with an effective response but also perpetuates disaster mythology Fisher presents striking comparisons between the perception of disaster in the eyes of the general public the actual situations emergency responders face and the way mass media reporters broadcast information Additionally the problems encountered by emergency response organizations are compared and contrasted with general public and media perceptions of disaster response Fisher presents the response to September 11 2001 the south Asian tsunami and hurricane Katrina in this comprehensive third edition **Observing the Moon** Peter T. Wlasuk, 2013-04-17 Why write another guide to observing the Moon That was the question I was pondering as I began this project having a fine collection of classic lunar guidebooks dating back to 1791 in my own library As a Fellow of the Royal Astronomical Society RAS member of the American Astronomical Society s Division for Planetary Sciences AAS DPS and member of the American

Geophysical Union AGU I am fortunate to know many professional lunar scientists who keep me up to date with developments in lunar science contrary to public perception lunar science has definitely not stagnated since the last Apollo No 17 left the surface of the Moon in December 1972 I am also lucky to know many amateur lunar observers who like me enjoy actually looking at the Moon with telescopes and imaging it with a wide variety of devices ranging from regular 35 mm cameras to video recorders and CCD cameras My friends who study the Moon whether in their professions or just for fun gave me several reasons for doing another lunar guidebook First the last lunar observer's guide of any length was published over ten years ago and many reviewers noted that it was badly out of date even then

Organizational Ethnography Sierk Ybema, Dvora Yanow, Harry Wels, Frans H Kamsteeg, 2009-08-20 Just as newspapers do not typically engage with the ordinary experiences of people's daily lives so organizational studies has also tended largely to ignore the humdrum everyday experiences of people working in organizations However ethnographic approaches provide in depth and up close understandings of how the everydayness of work is organized and how in turn work itself organizes people and the societies they inhabit Organizational Ethnography brings contributions from leading scholars in organizational studies that serve to unpack an ethnographic perspective on organizations and organizational research The authors explore the particular problems faced by organizational ethnographers including questions of gaining access to research sites within organizations the many styles of writing organizational ethnography the role of friendship relations in the field problems of distance and closeness the doing of at home ethnography ethical issues standards for evaluating ethnographic work This book is a vital resource for organizational scholars and students doing or writing ethnography in the fields of business and management public administration education health care social work or any related field in which organizations play a role

Organizations Jan Achterbergh, Dirk Vriens, 2009-08-07 to do to ensure survival and 2 principles for designing organizational structures in such a way that they can realize the required functions adequately In the course of their elaboration we will show that these principles are general i.e. that they hold for all organizations

1.5 Conceptual Background To describe organizations as social systems conducting experiments and to present

principles for designing an infrastructure supporting the social experiment we use concepts from organizational cybernetics social systems theory and Aristotle s ethics In this book we hope to show that concepts from these traditions as introduced by their relevant representatives can be integrated into a framework supporting our perspective on organizations To this purpose we introduce in each of the following chapters relevant concepts from an author belonging to one of these three traditions and show how these concepts contribute to either describing organizations as social experiments in Part I of the book to formulating principles for the design of functions and organization structures supporting meaningful survival Part II or to formulating principles for the design of organization structures enabling the rich sense of meaningful survival Part III Of course the relevance of cybernetics social systems theory and Aristotle s ethics can only be understood in full after they have been treated in more detail but based on what we said above it may already be possible to see why these theories have been chosen as conceptual background
