Spontaneous Activity In Education The Advanced Montessori Method:

Spontaneous Activity in Education Maria Montessori, 1917 **Spontaneous Activity in Education** Maria Montessori, 2014-07-02 The Montessori Method represents an explicit idealism and turn away from war and violence toward peace and reconstruction. It is built on coherent visions of how to improve human society by helping children realize their full potential as intelligent creative whole persons. In the Montessori Method, children are viewed as active authors of their own development, strongly influenced by natural dynamic self-righting forces within themselves, opening the way toward growth and learning. Teachers depend for their work with children on carefully prepared aesthetically pleasing environments that serve as a pedagogical tool and provide strong messages about the curriculum and about respect for children. Partnering with parents is highly valued in the Montessori Method, and children are evaluated by means other than traditional tests and grades.

Spontaneous Activity in Education: A Basic Guide to the Montessori Methods of Learning in the Classroom Maria Montessori, 2018-06-20 Spontaneous Activity in Education details the principles of Maria Montessori's educational philosophy, allowing the reader to grasp her unique and innovative style of teaching. Published in the early 20th century and translated to English in 1917, this manual of education contains a step-by-step account of the approach Montessori took in teaching youngsters. Although a doctor by trade, Montessori held a profound interest in the development of young people's minds and how best to ensure they fulfill their academic potential. To this end, she devised a system of education which aims to give every child the best chance of success, irrespective of their individual capacity for learning. In this book, the Montessori system is explained in terms useful for parents and teachers alike. Explaining the nature of a child's life, Montessori discusses her personal contributions to experiments in education and how, when these were applied correctly, the achievement and advancement of children was improved.
