Management Competence Andreas Enders, 2012-12-06 Eight years ago the production management department of the WHU launched the industry competition Best Factory Industrial Excellence Award jointly with the media partner Wirtschaftswoche in Germany Two years earlier the competition had been initiated successfully by INSEAD faculty in France Over the years the joint research team experienced first hand that application of Management Quality was a key driver of continuous improvement along the firm's core business processes Moreover those companies that exhibited the highest improvement rates achieved mostly the best business results compared to their industry benchmarks Andreas Enders accompanied us for five rounds of the competition as program manager for the German competition His contributions among others the launch of our web site www.beste-fabrik.de are greatly acknowledged by the academic advisory team The findings of the industry competition greatly influenced this thesis on Management Competence Initially the main research question though was to provide a theoretic foundation and an empirical test for the seven factor Management Quality model as defined in our recent book on Industrial Excellence Management Quality consists of strategy formulation and deployment combined with delegation of tasks to workers and their participation In addition measurement integration communication and training complement the main levers While there exist numerous studies on superior business performance and key success factors there are few sound empirical studies available to date on operational performance and sustained business success

The Internet and the Customer-Supplier Relationship Stefano Ronchi, 2024-11-01 This title was first published in 2003 An exhaustive and synthetic framework for the use of Internet tools in customer supplier relationships is one aspect of e business that is still missing from existing literature This book analyses the main management implications related to the adoption of the Internet in the supply chain and unifies different research studies and contributions in order to build such a framework It is based on wide empirical evidence including four in depth case studies in both Europe and the US a cross industry survey of more than 160 US companies and

website research describing emerging Internet initiatives in B2B relationships By creating a concrete link between theory and practice it should appeal to academics and practitioners alike

Management Accounting & Control Scales Handbook Utz Schäffer,2007-11-23 Utz Schäffer describes all scales including the psychometric qualities as well as samples which have been used in great detail Thus the reader of this book can avoid reinventing the wheel as it will in many cases reduce the need to conceptualize test and validate a measure from scratch

Test Scoring David Thissen,Howard Wainer,2001-05 Test Scoring provides a summary of traditional true score test theory and modern item response theory related to scoring tests as well as novel developments resulting from the integration of these approaches The background material introduced in the first four chapters builds a foundation for the new developments covered in later chapters These new methods offer alternative psychometric approaches to scoring complex assessments Each of the book's contributors draws from the classic literature of traditional test theory as well as psychometric developments of the past decade The emphasis is on large scale educational measurement but the topics and procedures may be applied broadly within many measurement contexts Numerous graphs and illustrative examples based on real tests and actual data are integrated throughout This multi authored volume shows the reader how to combine the coded outcomes on individual test items into a numerical summary about the examinee's performance This book is intended for researchers and students in education and other social sciences interested in educational assessment and policy the design and development of tests and the procedures for test administration and scoring Prerequisites include an introduction to educational and psychological measurement and basic statistics Knowledge of differential and integral calculus and matrix algebra is helpful but not required
