Leveraging Applications of Formal Methods, Verification and Validation Tiziana Margaria, Bernhard Steffen, 2008-11-05. This volume contains the conference proceedings of ISO/LA 2008, the Third International Symposium on Leveraging Applications of Formal Methods, Verification and Validation, which was held in Porto Sani, Kassandra, Chalkidiki, Greece, during October 13-15, 2008, sponsored by EASST and in cooperation with the IEEE Technical Committee on Complex Systems. Following the tradition of its forerunners in 2004 and 2006 in Cyprus and the ISO/LA Workshops in Greenbelt, USA, in 2005 and in Poitiers, France, in 2007, ISO/LA 2008 provided a forum for developers, users, and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification, analysis, verification, certification, construction, test, and maintenance of systems from the point of view of their different application domains. Thus, the ISO/LA series of events serves the purpose of bridging the gap between designers and developers of rigorous tools and users in engineering and in other disciplines and to foster and exploit synergetic relationships among scientists, engineers, software developers, decision makers, and other critical thinkers in companies and organizations. In particular, by providing a venue for the discussion of common problems, requirements, algorithms, methodologies, and practices, ISO/LA aims at supporting researchers in their quest to improve the utility, reliability, flexibility, and efficiency of tools for building systems and users in their search for adequate solutions to their problems.

Non-Formal Education Alan Rogers, 2007-03-06. The Comparative Education Research Centre (CERC) at the University of Hong Kong is proud and privileged to present this book in its series CERC Studies in Comparative Education. Alan Rogers is a distinguished figure in the field of non-formal education and brings to this volume more than three decades of experience. The book is a masterly

account which will be seen as a milestone in the literature It is based on the one hand on an exhaustive review of the literature and on the other hand on extensive practical experience in all parts of the world It is a truly comparative work which fits admirably into the series Much of the thrust of Rogers work is an analysis not only of the significance of non formal education but also of the reasons for changing fashions in the development community Confronting a major question at the outset Rogers ask why the terminology of non formal education which was so much in vogue in the 1970s and 1980s practically disappeared from the mainstream discourse in the 1990s and initial years of the present century Much of the book is therefore about paradigms in the domain of development studies and about the ways that fashions may gloss over substance
