Teaching And Learning Language And Culture:

Teaching-and-learning Language-and-culture Michael Byram,1994-01-01 Offers some theoretical innovations in teaching foreign languages and reports how they have been applied to curriculum development and experimental courses at the upper secondary and college levels Approaches language learning as comprising several dimensions including grammatical competence change in attitudes learning about another culture and reflecting on one's own Annotation copyright by Book News Inc Portland OR *Language, Culture, and Teaching* Sonia Nieto,2017-09-01 Distinguished multiculturalist Sonia Nieto speaks directly to current and future teachers in this thoughtful integration of a selection of her key writings with creative pedagogical features Offering information insights and motivation to teach students of diverse cultural racial and linguistic backgrounds examples are included throughout to illustrate real life dilemmas about diversity that teachers face in their own classrooms ideas about how language culture and teaching are linked and ways to engage with these ideas through reflection and collaborative inquiry Designed for upper undergraduate and graduate level students and professional development courses each chapter includes critical questions classroom activities and community activities suggesting projects beyond the classroom context Language Culture and Teaching explores how language and culture are connected to teaching and learning in educational settings examines the sociocultural and sociopolitical contexts of language and culture to understand how these contexts may affect student learning and achievement analyzes the implications of linguistic and cultural diversity for classroom practices school reform and educational equity encourages practicing and preservice teachers to reflect critically on their classroom practices as well as on larger institutional policies related to linguistic and cultural diversity based on the above understandings and motivates teachers to understand their ethical and political responsibilities to work together with their students colleagues and families for more socially just classrooms schools and society Changes in the Third Edition This edition includes new and updated chapters section introductions critical questions classroom and community activities and resources bringing it up to date in terms of recent educational policy issues and demographic changes in the U S and beyond The new chapters reflect Nieto's current thinking about the profession and society especially about changes in the teaching profession both positive and negative since the publication of the second edition of this text **Mediating Languages and Cultures** Dieter Buttjes,Michael Byram,1991 The history of language teaching is shot through with methods and approaches to language learning most recently with communicative language teaching but this book demonstrates that a more differentiated and richer understanding of learning a foreign language is both necessary and desirable Languages and cultures are interlinked and interdependent and their teaching and learning should be too Learning another language is part of a complex process of learning and understanding other people's ways of life ways of thinking and socio economic experience Context and Culture in Language Teaching and Learning Michael Byram,Peter Grundy,2003 The now familiar forces of globalisation and internationalisation are influencing the role

and significance of language teaching and learning in contemporary classrooms This affects the ways in which English is taught and learnt in particular but is also an inevitable factor in all language teaching and learning The authors of the chapters in this book all share a concern to explore the ways in which the contexts in which language teaching takes place impact on the aims and the methods of language teaching Some do so by discussing the implications for what research we do and how we do it Kramsch for example explains in detail how her own research evolves from issues which arise in the classroom In other chapters the changing nature of the teaching of English is presented from empirical research Decke Cornill for example identifies different philosophies of language teaching among different kinds of English teacher in Germany Other authors present studies of the ways in which what learners bring to the learning process from their own contexts and languages has to be taken into consideration if we are to understand language learning Holme shows this from close analysis of the acquisition of metaphorical language and Wendt argues for the importance of a social constructivist theory of language learning Our common purpose is to take a fresh look at teaching and research through the perspective of the inevitable connections between contexts cultures and classrooms
