Teaching And The Case Method Text Cases And Readings:

Teaching and the Case Method Louis B. Barnes, Carl Roland Christensen, Abby J. Hansen, 1994 This third edition of Teaching and the Case Method is a further response to increased national and international interest in teaching teachers and learning as well as the pressing need to enhance instructional effectiveness in the widest possible variety of settings Like its predecessors this edition celebrates the joys of teaching and learning at their best and emphasizes the reciprocal exchange of wisdom that teachers and students can experience It is based on the belief that teaching is not purely a matter of inborn talent On the contrary the knowledge skills and attitudes that make for excellence in teaching can be analyzed abstracted and learned One key premise of Teaching and the Case Method is that all teaching and learning involve a core of universally applicable principles that can be discerned and absorbed through the study and discussion of cases Teaching and the Case Method Louis B. Negoita, 2004-10-14. We were very pleased to once again extend to the delegates, and we are pleased to say our friends, the warmest of welcomes to the 8th International Conference on Knowledge-Based Intelligent Information and Engineering Systems at Wellington Institute of

Technology in Wellington New Zealand The KES conferences attract a wide range of interest The broad focus of the conference series is the theory and applications of computational intelligence and emergent technologies Once purely a research field intelligent systems have advanced to the point where their abilities have been incorporated into many conventional application areas The quest to encapsulate human knowledge and capabilities in domains such as reasoning problem solving sensory analysis and other complex areas has been avidly pursued This is because it has been demonstrated that these abilities have definite practical applications The techniques long ago reached the point where they are being exploited to provide commercial advantages for companies and real beneficial effects on profits KES 2004 provided a valuable mechanism for delegates to obtain a profound view of the latest intelligent systems research into a range of algorithms tools and techniques KES 2004 also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas The combination of theory and practice represents a uniquely valuable opportunity for appreciating the full spectrum of intelligent systems activity and the state of the art

Transforming IT education Christine Bruce, George M. Mohay, Glenn Smith, Ian Stoodley, Robyn Tweedale, 2006 It is by now an obvious observation that much of the world depends on information technology Our infrastructure relies on IT our buildings finance systems roads airplanes cars televisions washing machines and bread makers as does much of what we do our banking learning and communicating Almost everyone today uses information technology but few know how it works and very few indeed understand the mysteries of how to build new systems This imbalance between users and knowers grows worse every year With the dot com collapse the number of students studying computers and information technology more generally has been shrinking steadily In the long run this trend is not likely to be a good thing either in Australia or elsewhere What can we do about this IT courses worldwide report falling enrolments and high attrition The glamour of computing seemingly effortless graphics and animations and the management of massive computations and data sets is at odds with the reality of how difficult it can be to coax computers into exhibiting these advanced capabilities and many students find the transition from the dream to reality too difficult to master One possibility is to reconceptualize both what and how we teach making IT more attractive to students without sacrificing the rigour and depth needed to produce graduates capable of life long learning against the backdrop of rapidly evolving technologies The Faculty of Information Technology at QUT has long sought to develop curricula and pedagogies that make this possible The results of this search show in innovative curricula real world engagement and a dominant position in our local market for IT education QUT's strategic plan the QUT Blueprint exhorts the University to be bold experiment and engage with the real world in order to ensure we remain relevant and attuned to the needs of both our graduates and the industries that will employ them The contents of this book report on a significant part of our response to this challenge I'm honoured to be able to write this preface only a year after I joined QUT the work herein is a credit to my two predecessors as Deans of the Faculty Professors Dennis Longley and John Gough and to all the staff of the Faculty both

academic and professional and current and past Hopefully it will also help to inspire a new generation of staff and students To you the reader this book is best thought of as a snapshot of a long quest to discover the secrets of how best to approach the moving feast that is IT education It will be of interest to those looking to develop new curricula of their own or benchmark their own journeys of discovery We should never imagine that we have all the answers indeed it s our hope that readers will learn from and improve on what we have achieved and share their insights with us in return so that the co evolution of ICT teaching around the world can be facilitated
