Van den Abbeele, 1869 **Teaching Atlas of Nuclear Medicine (Classic Reprint)** Annick D. Van Den Abbeele, 2016-08-01 Excerpt from Teaching Atlas of Nuclear Medicine Before the commencement of the war it was a generally accepted theory that a first class pilot of an aeroplane could not be produced under a minimum of a year Under present conditions the average young man can learn to handle an aeroplane and put it through all the known tricks Of looping rolling nose dive spins side slips etc after a period of instruction of approximately no more than from twenty to thirty hours of actual ying That is a most extraordinary advance and it is in but slight part due to the improvements in engines and aeroplanes Rather it is almost entirely due to 1 the knowledge we now have as to how to execute aerial manoeuvres or aerobatics 2 the improved methods of acquiring such knowledge and 3 the confidence which we now know a pupil may have in attempting feats which in the past were looked upon as dangerous and as mere circus tricks About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Case-Based Nuclear Medicine Kevin J.
