the form of brief nontechnical annotations that teachers and other nonresearchers will actually enjoy reading Each study is briefly described and then commented on from a researcher's perspective, a teacher's perspective and finally a shared perspective The 30 reports address important practical issues recognizable to anyone familiar with what happens in a physical education class The book shows how the studies can be useful to teachers in their own work and it points out how valuable information from research can be used to improve teaching The book also demonstrates how stimulating and fruitful dialogue can be when the knowledge of researchers and practitioners is brought together around a single study By discussing each study from both perspectives the book sheds light on the common ground between researchers and physical educators and fosters mutual respect between the two The varied perspectives can also provide a valuable springboard for thought provoking discussions among colleagues in a school setting or in a graduate level physical education course The book presents 12 guidelines that will help readers navigate through the difficult aspects of the typical research report plus four annotated bibliographies to help readers explore topics that are more specific and more advanced No other resource makes such a diverse group of studies so accessible If educators are to put research to work in their own teaching methods and program designs there's no better place to start than with these straightforward conversations in the gym
