that all of our children's talents can find expression. These two volumes provide teaching materials and background information on gender equity for teacher educators in mathematics, science, and technology education and their students. A practical guide, *Gender Equity Right from the Start*, is usable by professors of education for preservice teachers and by staff developers for in-service teachers. By adapting the material for other subjects, it can also be used by teacher educators in content areas other than math, science, and technology. It consists of two volumes: *Instructional Activities for Teacher Educators in Mathematics, Science, and Technology* contains some 200 teaching activities on the major issues in gender equity, emphasizing solutions and not just problems. Activities take place in/out of class assignments and field experiences whenever possible to minimize demands on class time. *Sources and Resources for Education Students in Mathematics, Science, and Technology* contains student materials needed for the activities as well as extensive print/electronic, organizational, and other resources for further information.

Wise Women Phyllis Freeman, Jan Schmidt, 2013-12-02 *Wise Women* is a collection of autobiographical essays by important and renowned teachers at mid-life. The essays, which are deeply personal, will focus on how these women negotiate the psychological, physical, and social changes brought on by menopause and how the aging process affects their lives as professionals, feminists, writers, mentors, and instructors in the academy. The book addresses such questions as the following: What challenges are left for the feminists who came of age during the women's movement and now have achieved academic success? How do women teachers experience their aging selves in the classroom? What legacy will mid-life women leave their younger women colleagues? All of these questions, as well as many others, are covered in this insightful and groundbreaking work. NWSA Journal, 1993

Women in Power Barbara K. Curry, 2000 In this exciting addition to the field of leadership development, author Barbara Curry charts a course for women as leaders on their own terms. Curry moves beyond traditional formulaic conceptions to examine leadership as a fluid, adaptive process closely entwined with adult development. Drawing from philosophical, sociological, and physiological explorations of the leader persona, Curry approaches leadership as an interdisciplinary art. She casts aside mythical characterizations of leadership to illuminate a more holistic conceptual framework that fosters the development of authentic leadership. Using portraits of eight women in high-level leadership roles, Curry probes the kinds of conflict that often accompany women's ascendancy to positions of power. Thoughtfully, Curry examines the constellation of character traits and environmental circumstances that

enable individuals to perceive of themselves as leaders and to function productively in such roles The book s dynamic approach provides a bridge between explanation and proactive intervention offering guidance for organizations and institutions aiming to encourage employees ascendancy to leadership positions Through incisive analysis of the psychological and sociological evolution of women s emergence in leadership roles the Developing Leader Persona will enable both women and men to don the mantle of leadership with increased confidence
