**Learning Science** Wolff-Michael Roth, 2006-01-01 How do you intend to learn know see something that you do not yet know Given the theory laden nature of perception how do you perceive something in a science demonstration that requires knowing the very theory that you are to learn In this book the author provides answers to these and other intractable problems of learning in science He uses both first person phenomenological methods critically analyzing his own experiences of learning in

unfamiliar situations and third person ethnographic methods critically analyzing the learning of students involved in hands on investigations concerning motion and static electricity Roth continues his longstanding interest in understanding how we learn science and the question why all the changes to science education made over the past five decades have a significant impact of increasing understanding and interest in the subject Roth articulates in his concluding chapter that the problem lies in part with the theories of learning employed in the course of his biographical experience he has appropriated and abandoned numerous theoretical frameworks including radical social constructivism because they fell short when it came to understand real time processes in school science classrooms This book which employs the cognitive phenomenological method described in the recently published *Doing Qualitative Research Praxis of Method Sense* Publishers 2005 has been written for all those who are interested in learning science undergraduate students preparing for a career in science teaching graduate students interested in the problems of teaching and learning of science and faculty members researching and teaching in science education
