Teaching-learning mathematics

ABSTRACT

The purpose of this study was to explore the critical life-course of the first author's journey of learning and teaching mathematics that prompted critical thinking about his past experiences as a student and teacher. It portrays a paradigmatic shift from a traditionalist thinker to a constructivist actor in the classroom from the critical life-course within and out of classroom experiences by using autoethnography as the writing and research genre by connecting his personal experiences in the social, cultural, and teaching-learning contexts of Nepal. The major themes emerged from the autoethnography were: Thinking Narratively: Joining a School and Dropping Out; Thinking Narratively: Back to School and Dropping In; Thinking Incompletely: Dropping out of School; Thinking Partially: Dropping in School; and Nightmares of the First Teaching: A Pedagogical Boomerang. These themes portrayed a pedagogical boomerang in learning and teaching mathematics from a remote village in Western Nepal to the neighbourhood of the capital city Kathmandu.

1. INTRODUCTION

Mathematics teaching and learning in Nepal (and possibly other places) seem to have several issues, challenges, and ongoing problems despite efforts to reform curriculum, teaching-learning practices, and instruments to integrate traditional cultural relevance to the classroom or modern technological advances of digital gadgets and learners. The notion of the traditional cultural relevance of mathematics teaching and learning emphasized local context and practices without constructing critical mathematical tasks for higher-level reasoning and thinking [1, 2]. The integration of modern technological advancement with mathematics teaching-learning has not yet been fully realized in mathematics curriculum and pedagogy. However, educational institutions and teachers have emphasized using such tools [3] despite challenges in meaningful construction of lessons, engagement of students, and radical shift in the classroom designs and practices. The National Curriculum Framework (NCF) of Nepal [4] emphasized a traditional and modern approach to teaching-learning with both open and regular classroom-based education in Nepal. The traditional approach to education highlighted the cultural values, long-held traditions, vernacular and local knowledge. In contrast, the modern approach to education emphasized the notion of globalization and global village balancing the
