Student Teaching and the Law Perry Alan Zirkel,Zorka Karanxha,2009 This mathematical study was initially written as a set of notes in complex analysis over the spring and summer of 2013 Its purpose is to clarify the techniques and results of complex analysis by using a dialogue between master and student Its inspiration is the belief that this form of open conversation can show the reader both the tension and structure of the material For this reason dialogue can prove to be a very powerful and eloquent form of mathematical instruction The book begins with an introduction to sequences and topology before tackling the topics of complex differentiability Taylor series contour integration and the calculus of residues After all this complex functions are studied as conformal mappings leading naturally to the Riemann mapping theorem Before going on to the proof of this theorem the focus shifts to the study of heat and Fourier analysis The techniques of complex analysis are used to aid in studying the Fourier series and transform The study then returns to conformal mappings in the context of solving Laplace s equation on various regions After this the topic becomes the study of special functions culminating in Riemann s proof of the prime number theorem and then shifting focus once again to the doubly periodic elliptic functions The final chapter is not standard in an introductory complex analysis book and concerns the study of Theta functions and modular forms There is a separate appendix of color plots to accompany this book This work was mostly modeled after Elias Stein s lecture series at Princeton

Principals Avoiding Lawsuits David Schimmel,Suzanne Eckes,Matthew Militello,2017-03-20 This book gives principals the tools they need to avoid lawsuits by teaching their staff the information they need to practice preventive law Lawsuits often begin when teachers unintentionally violate students rights such as searching a student s cell phone without reasonable suspicion or failing to follow a student s Individualized Education Program These violations do not occur because teachers

intend to break the law They occurred because the vast majority of teachers are not required to learn about the rights and responsibilities of students and teachers in their teacher preparation programs As a result most teachers get their legal information from the law school of the teachers lounge that is from colleagues who are similarly uninformed and misinformed Instead what teachers want and need is an in service program that will provide them with a basic understanding of school law But most busy principals don t have the time knowledge and resources to provide such a program for their staff This book will meet this critical unmet need It provides principals with the resources and lesson plans they need to incorporate school law into their professional development program As a result their teachers will get their information about school law from a reliable source not from the rumors fears and myths of the teachers lounge By empowering their teachers with legal knowledge principals and teachers will avoid lawsuits by becoming partners in the practice of preventive law **Student**
