Teaching Citizenship Through Traditional:

Teaching Citizenship Through Traditional Tales Sue Ellis, Deirdre Grogan, 2003 Scholastic Teacher Bookshop provides a wonderful range of titles reflecting current issues in education as well as the most popular primary curriculum areas. Teachers can browse through The Bookshop and choose those titles that meet their particular needs and take their fancy. The varied format of titles in this series enables subjects to be covered in a way that is most appropriate to the content. In real life choices between right and wrong are often not a simple matter. Children need to learn how to make balanced judgements based on consideration of all the facts. Often the safest environment in which to look in depth at such issues is a fictional one. And one of the most appropriate genres of fiction for this age group is traditional tales. Working within the context of traditional tales enables children to express their own opinions and explore their true beliefs in a fun, safe and believable context. This book provides thought-provoking letters relating to a number of well-known traditional tales and around which discussion and writing can be focused. Through using the letters, children are encouraged to explore concepts of fairness, the nature of right and wrong, the process of making moral judgements and decisions, human nature, motivation and relationships, value, power and uses of money, the ways in which different situations can be interpreted and how their own views are informed by their own experiences.

(Re)Constructing Memory: Textbooks, Identity, Nation, and State James H. Williams, Wendy D. Bokhorst-Heng, 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts, some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation as they look at the shifting boundaries of insider and outsider. This book is thus about who we are, not only demographically but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provide ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding in increasingly larger and more inclusive contexts.

Resources in Education, 1999 Who's Afraid of Political Education? Henry Tam, 2024-12-10 Democracy should enable citizens to play an informed role in determining how power is exercised for their common wellbeing but this only works if people have the understanding skills and confidence to engage effectively in public affairs. Otherwise any voting system can be subverted to serve the interests of propagandists and demagogues. This book brings together leading experts on learning for democracy to explore why and how the gap in civic competence should be bridged. Drawing on research findings and case examples from the UK, the US and elsewhere it will set out why change is necessary, what could be taught differently to ensure effective political engagement and how a lasting impact in improving citizens' learning for democratic participation can be made.
