   Models for Improving College Teaching Jon E. Travis,1997 This report presents a collection of teaching models to help college faculty improve their teaching Six categories of teaching models are presented 1 assessment and feedback models including the Classroom Assessment model created by Angelo and Cross and already widely used among community college faculty 2 discussion and sharing models such as the Great Teachers Seminar which provide faculty with an event and an environment especially conducive to sharing ideas among colleagues 3 dissemination models which dispense an extensive assortment of ideas to large audiences of faculty 4 clinical development models such as the Instructional Skills Workshop which uses a laboratory setting common to teacher preparation programs 5 teaching and learning models such as Anderson s Adaptive Control of Thinking model which describes the learning process and presents specific procedures to facilitate specific learning types and 6 instructional planning models such as Gagne s Instructional Event Design that can help the faculty member through the process of course and lesson planning Three appendixes provide teaching resource lists and sample questions using classification systems Contains approximately 240 references MDM   The College Teacher's Handbook Magna Publications Incorporated,2018-05   **Inspired College Teaching** Maryellen Weimer,2010-02-22 Praise for Inspired College Teaching The thoughtfulness personalization and consideration Maryellen Weimer demonstrates in

discussing the experience of faculty members her ability to identify issues that are shared and solvable and her suggestions and solutions to commonly experienced stressors and difficulties in college teaching are major strengths of this volume In addition her personal and professional reflections on her long career as a faculty member writer and faculty developer expose tantalizing research questions that young education researchers might want to examine The originality of this volume is its exploration of and reflection on a faculty member s career from a long term perspective The focus on iterative self and course renewal is personal and thus practical In a way it is a workshop between book covers or perhaps several workshops Laura L B Border director Graduate Teacher Program and Collaborative Preparing Future Faculty Network University of Colorado at Boulder A book by Maryellen Weimer always displays her wonderful grasp of the literature on college teaching and learning her ability to tell good stories and her wit and wisdom This one is no exception Nancy Van Note Chism professor Indiana University School of Education Indiana University Purdue University Indianapolis Although I work at a faculty teaching center and encounter many books on teaching I have seen very few that span the full arc of the teaching career and what steps can be taken at each stage in order to retain vitality all the way through the way that this book does I look forward to getting my own copy and using it as a resource in the faculty development activities of my center It will have a wide readership Mano Singham University Center for Innovation in Teaching and Education Case Western Reserve University *The Craft of College Teaching* Robert DiYanni,Anton Borst,2020-03-03 The essential how to guide to successful college teaching and learning The college classroom is a place where students have the opportunity to be transformed and inspired through learning but teachers need to understand how students actually learn Robert DiYanni and Anton Borst provide an accessible hands on guide to the craft of college teaching giving instructors the practical tools they need to help students achieve not only academic success but also meaningful learning to last a lifetime The Craft of College Teaching explains what to teach emphasizing concepts and their relationships not just isolated facts as well as how to teach using active learning strategies that engage students through problems case studies and scenarios and practice reinforced by constructive feedback The book tells how to motivate students run productive discussions create engaging lectures use technology effectively and much more Interludes between chapters illustrate common challenges including what to do on the first and last days of class and how to deal with student embarrassment manage group work and mentor students effectively There are also plenty of questions and activities at the end of each chapter Blending the latest research with practical techniques that really work this easy to use guide draws on DiYanni and Borst s experience as professors faculty consultants and workshop leaders Proven in the classroom and the workshop arena The Craft of College Teaching is an essential resource for new instructors and seasoned pros alike An Evidence-based Guide to College and University Teaching Aaron S. Richmond,Guy A. Boysen,Regan A. R. Gurung,2016-06-10 What makes a good college teacher This book provides an evidence based answer to that question by presenting a set of model teaching characteristics that define what makes a good

college teacher Based on six fundamental areas of teaching competency known as Model Teaching Characteristics outlined by The Society for the Teaching of Psychology STP this book describes how college faculty from all disciplines and at all levels of experience can use these characteristics to evaluate guide and improve their teaching Evidence based research supports the inclusion of each characteristic each of which is illustrated through example to help readers master the skills Readers learn to evaluate their teaching abilities by providing guidance on what to document and how to accumulate and organize the evidence Two introductory chapters outline the model teaching characteristics followed by six chapters each devoted to one of the characteristics training instructional methods course content assessment syllabus construction and student evaluations The book Features in each chapter self evaluation surveys that help readers identify gaps between the model characteristics and their own teaching case studies that illustrate common teaching problems discussion questions that encourage critical thinking and additional readings for further exploration Discusses the need to master teaching skills such as collaborative learning listening and using technology as well as discipline specific knowledge Advocates for the use of student learning outcomes to help teachers better evaluate student performance based on their achievement of specific learning goals Argues for the development of learning objectives that reflect the core of the discipline s theories and applications strengthen basic liberal arts skills and infuse ethical and diversity issues Discusses how to solicit student feedback and utilize these evaluations to improve teaching Intended for professional development or teacher training courses offered in masters and doctoral programs in colleges and universities this book is also an invaluable resource for faculty development centers college and university administrators and college teachers of all levels and disciplines from novice to the most experienced interested in becoming more effective teachers   Teaching & Learning in College Gary S. Wheeler,2002 Gary Wheeler of Miami University has assembled six leading educators to present a collection of issues offering valuable insight into the state of teaching and learning to a target audience of graduate students and relatively new higher education faculty These are co authors who speak authoritatitively on topics but who have also taken the time to personalize the information Topics include the role of community in learning diversity and new roles for faculty developers computing the value of teaching dialogues teaching and learning different academic settings teaching and learning as a transactional process and more than a thermometer using assessment effectively From publisher s description   *Teaching Strategies for the College Classroom* Maryellen Weimer Ph. Harvey,Teresa Heinz Housel,2011-09-26 Gain a greater understanding of the academic cultural and social experiences of first generation college students FGS Fascinating heart touching and important the research and the stories presented here enlighten what FGS often have to overcome to successfully complete their degrees With an emphasis on improving FGS college success retention and graduation rates this volume first covers common obstacles and the trend of FGS continuing on for graduate degrees Section Two discusses the complex interplay of social academic emotional and financial influences on academic performance The chapters collectively affirm that the commitment of university resources is critical to college success This is the 127th volume of the Jossey Bass higher education quarterly report New Directions for Teaching and Learning which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers **Preparing for College and University Teaching** Joanna Gilmore,Molly Hatcher,2023-07-03 This book is a guide for designing professional development programs for graduate students The teaching competencies framework presented here can serve as the intended curriculum for such programs The book will also be an excellent resource for evaluating programs and will be an excellent resource for academics who study graduate students This book presents the work of the Graduate Teaching Competencies Consortium to identify organize and clarify the competencies that graduate students need to teach effectively when they join the professoriate To achieve this goal the Consortium developed a framework of 10 teaching competencies organized around three overarching questions What do graduate students need to achieve by the end of their graduate education to be successful teacher scholars What do graduate students need to understand about higher education to have successful careers as educators What do graduate students need to do to be successful teachers during their graduate student careers Although much work has been done to identify the competencies of effective teachers in higher education only a small portion of this work has been conducted with graduate student instructors This is an important area of research given that graduate students are critical in the higher education academic pipeline Nationally graduate students teach between 25% and 50% of courses offered at the undergraduate level Graduate student teaching is also critical because during early teaching experiences teachers establish a teaching style and set of teaching skills which will endure as graduate students enter the professoriate It is important to develop a teaching competency framework that is specific to graduate student instructors as they often have unique needs and roles as teachers For example graduate student instructors are in the unique position of becoming experts in their field concurrent with learning to teach Moreover as many professional development programs for graduate student instructors evolve based upon factors such as available resources and perceived needs of graduate students this framework will be a useful aid for thoughtfully designing strategic evidence based

comprehensive professional development opportunities and programs
