## **Teaching Machines Programmed Learning:**

**Teaching Machines and Programmed Learning** Arthur A. Lumsdaine, Robert Glaser, 1960      *Teaching Machines* Audrey Watters, 2021-08-03 How ed tech was born Twentieth century teaching machines from Sidney Pressey's mechanized test giver to B F Skinner's behaviorist bell ringing box Contrary to popular belief ed tech did not begin with videos on the internet The idea of technology that would allow students to go at their own pace did not originate in Silicon Valley In Teaching Machines education writer Audrey Watters offers a lively history of predigital educational technology from Sidney Pressey's mechanized positive reinforcement provider to B F Skinner's behaviorist bell ringing box Watters shows that these machines and the pedagogy that accompanied them sprang from ideas bite sized content individualized instruction that had legs and were later picked up by textbook publishers and early advocates for computerized learning Watters pays particular attention to the role of the media newspapers magazines television and film in shaping people's perceptions of teaching machines as well as the psychological theories underpinning them She considers these machines in the context of education reform the political reverberations of Sputnik and the rise of the testing and textbook industries She chronicles Skinner's attempts to bring his teaching machines to market culminating in the famous behaviorist's efforts to launch Didak 101 the pre verbal machine that taught spelling Alternate names proposed by Skinner include Autodidak Instructomat and Autostructor Telling these somewhat cautionary tales Watters challenges what she calls the teleology of ed tech the idea that not only is computerized education inevitable but technological progress is the sole driver of events      *Teaching Machines and Programming* K. Austwick, 2014-05-12 Teaching Machines and Programming covers the significant developments in teaching machines and automated teaching as well as the major theoretical issues and attributes involved in these procedures After a brief introduction to teaching machine procedures this six chapter text goes on summarizing the industrial and military applications of teaching machines The succeeding chapters consider the underlying theory function and schema of the adaptive teaching system which are related to recognizable teaching functions performed by a human tutor The last chapters discuss the development and features of linear programs and their application as new teaching aid These chapters also look into some practical problems arising in programming for schools This book will prove useful to computer programmers school administrators teachers and students      *Teaching Machines and Programmed Learning a Source Book* Arthur A.
