implications for English Language Teaching and teacher education We are currently witnessing a paradigm shift towards
Teaching English as an International Language TEIL that aims to promote multilingualism and awareness of the diversity of
Englishes increase exposure to this diversity embrace multiculturalism and foster cross cultural awareness Numerous
initiatives that embrace TEIL can be observed around the world but ELT and teacher education in Germany and other
European countries appear to be largely unaffected by this development with standard British and American English and the
monolingual native speaker including the corresponding cultural norms still being very much at the center of attention The

present volume addresses this gap and is the first of its kind to showcase recent initiatives that aim at introducing TEIL into ELT and teacher education in Germany but which have applicability and impact for other countries with comparable education systems and traditional ELT practices in the Expanding Circle. The chapters in this book provide a balanced mix of conceptual, empirical and practical studies and offer the perspectives of the many stakeholders involved in various settings of English language education whose voices have not often been heard: i.e. students, university lecturers, trainee teachers, teacher educators and in-service teachers. It therefore adds significantly to the limited amount of previous work on TEIL in Germany and bridges the gap between theory and practice that will not only be relevant for researchers, educators and practitioners in English language education in Germany but other educational settings that are still unaffected by the shift towards TEIL.
