Emotions and Religious Dynamics Mr Nathaniel A Warne, Professor Douglas J. Davies, 2014-02-28 We all feel emotions and are moved to action by them Religious communities often select and foster certain emotions over others Without understanding this it is hard to grasp the way groups view the world and each other Often it is the underlying emotional pattern of a group rather than its doctrines that either divides it from or attracts it to others These issues so important in today s world are explored in this book in a genuinely interdisciplinary way by anthropologists psychologists theologians and historians of religion and in some detailed studies of well and less well known religious traditions from across the world

projects of India and Pakistan the recent literature on religious nationalism and the need to integrate the study of the diaspora with the Sikhs in South Asia they provide a fresh approach to a complex subject Singh and Shani evaluate the current condition of Sikh nationalism in a globalised world and consider the lessons the Sikh case offers for the comparative study of ethnicity nations and nationalism *Religion and the Specter of the West* Arvind-Pal S. Mandair, 2009-10-23

Arguing that intellectual movements such as deconstruction postsecular theory and political theology have different implications for cultures and societies that live with the debilitating effects of past imperialisms Arvind Mandair unsettles the politics of knowledge construction in which the category of religion continues to be central Through a case study of Sikhism he launches an extended critique of religion as a cultural universal At the same time he presents a portrait of how certain aspects of Sikh tradition were reinvented as religion during the late nineteenth and early twentieth centuries India's imperial elite subtly recast Sikh tradition as a sui generis religion which robbed its teachings of their political force In turn Sikhs began to define themselves as a nation and a world religion that was separate from but parallel to the rise of the Indian state and global Hinduism Rather than investigate these processes in isolation from Europe Mandair shifts the focus closer to the political history of ideas thereby recovering part of Europe's repressed colonial memory Mandair rethinks the intersection of religion and the secular in discourses such as history of religions postcolonial theory and recent continental philosophy Though seemingly unconnected these discourses are shown to be linked to a philosophy of generalized translation that emerged as a key conceptual matrix in the colonial encounter between India and the West In this riveting study Mandair demonstrates how this philosophy of translation continues to influence the repetitions of religion and identity politics in the lives of South Asians and the way the academy state and media have analyzed such phenomena **Two Gurus One**
