Flood,Diane Lapp,Shirley Brice Heath,2004-09-22 In an era characterized by the rapid evolution of the concept of literacy the

Handbook of Research on Teaching Literacy Through the Communicative and Visual Arts focuses on multiple ways in which learners gain access to knowledge and skills. The handbook explores the possibilities of broadening current conceptualizations of literacy to include the full array of the communicative arts: reading, writing, speaking, listening, viewing, and to focus on the visual arts of drama, dance, film, art, video, and computer technology. The communicative and visual arts encompass everything from novels and theatrical performances to movies and video games. In today's world, new methods for transmitting information have been developed that include music, graphics, sound effects, smells, and animations. While these methods have been used by television shows and multimedia products, they often represent an unexplored resource in the field of education. By broadening our uses of these media formats and genres, a greater number of students will be motivated to see themselves as learners. In 64 chapters organized in seven sections, teachers and other leading authorities in the field of literacy provide direction for the future.
