

Primary teaching personal statement

I am a responsible, hard-working and friendly girl who is known for my strong passion to attain a career as a primary school teacher. I firmly believe that in order to become a great teacher, the desire to help and assist children should be there. The learning process can be tough and challenging, which is one of the reasons that I really love about this profession.

My interest in primary teaching started when I was volunteering at a summer play program sponsored by a local charity focusing on helping children between the ages 1 and 8. I found it particularly rewarding to finally see the satisfying look on a kid's face as they finish their artwork, or join a group activity. The feeling that I was able to help provide the children trust and confidence in themselves is just so great.

Closely working with children and parents has greatly improved my overall confidence. By the end of the program, I just found myself humming to the songs being played all throughout the day with much enthusiasm and passion. I had the opportunity to shadow a teacher at our local primary school. I was able to assist the children in reading, helping them with words that they think are difficult. I also participated in math lesson tutorials where children worked with their lessons. I just loved having the responsibility of supervising children as they learn and interact with different types of children.

It would certainly give me pleasurable to become part of the growth of the lives of children. I understand the fact that teaching is both tiring and taxing, but I am very much willing to reach my goal in order to become a head teacher. If I can achieve my goal, I believe that I would completely attain the confidence that I want to have some more.

Wayne Ross, Jeffrey Cornett, Gail McCutcheon, 1992-09-09 This book examines the relationship between teacher theorizing and teacher action as illustrated by the curricular and instructional practices of teachers The authors show that all teaching is guided by theory developed by the teachers Teachers could not begin to practice without some knowledge of the context of their practice and without ideas about what can and should be done in those circumstances In this sense teachers are guided by personal practical theories

Teachers' Personal Epistemologies Gregory Schraw,Jo Lunn Brownlee,Lori Olafson,Michelle Vander Veldt Brye,2017-07-01 The focus of this book is to explore teachers evolving personal epistemologies or the beliefs we hold about the origin and development of knowledge in the context of teaching The chapters focus on a range of conceptual frameworks about how university and field based experiences influence the connections between teachers personal epistemologies and teaching practice In an earlier volume we investigated preservice and inservice teachers beliefs and teaching practices Brownlee Schraw and Berthelsen 2011 While we addressed the nature of teachers personal epistemologies learning and teaching practices and approaches for changing beliefs throughout teacher education programs the volume did not address conceptual frameworks for the development of teacher s personal epistemologies To address this gap the book is focused on teacher educators teachers and teacher education programmers in universities with an overall aim of highlighting how we might support preservice teachers involvement in learning that is challenging and inservice teachers engagement in professional experiences that promote changes in teaching practice We argue that teachers need to be encouraged to question their beliefs and develop increasingly sophisticated beliefs about their knowledge and their students knowledge that facilitate learning and intellectual growth
