that vicariously acquaint future teachers with the difficult situations they will face Cases for Teacher Development Preparing for the Classroom is the perfect catalyst for this sort of teacher development The cases encourage students to immerse themselves in classroom situations before they begin their practice helping them link theory and experience All of the cases present relevant situations that replicate the complicated multitasked and interrelated realms of the teacher Teachers in Action Peter James,2001-04-23 The book provides a flexible framework for helping teachers on in service education and development programmes to investigate topics in their classrooms that are relevant to them It also offers a wealth of ideas and activities designed to help them develop professional knowledge skills and attitudes Teachers Under Pressure Maurice Galton,John MacBeath,2008-08-15 This is a well written and thoroughly researched book on an issue of vital importance It places the experiences of individual teachers under pressure into the larger UK and worldwide context Policy makers need to wake up to its messages Sara Bubb Institute of Education University of London What is it really like to be a teacher in today s demanding classrooms Maurice Galton and John MacBeath spoke to teachers parents and students in England and compared their responses to similar inquiries in Asia America Australia and New Zealand Their findings were disturbing Teacher stress and workload were persistent themes in the four studies with teachers frequently stretched to breaking point as they endeavour to make a difference to their pupils learning and welfare Issues examined in the book include frustrations facing those trying to make inclusive education work in practice effects of constantly changing policies on the staff required to implement them loss of status within the teaching profession reasons for teachers choosing to leave the profession the consequences of staying on and fighting for what one believes in This fascinating read will be of interest to anyone involved in teaching school leadership and educational policy **Restructuring Schools, Reconstructing Teachers** Peter Woods,Bob Jeffrey,Geoff Troman,Mari Boyle,2019-07-01 Drawing on wide ranging research this book originally published in 1997 explores how the policy changes of previous years were affecting primary teachers and their work at the time Within the context of worldwide restructuring the thoughts feelings and activities of teachers in their daily work are examined The core argument is that what used to be a complex but fulfilling job distinguished by professional dilemmas which are amenable to professional skill had become increasingly marked by tension and constraint which frustrates teacher creativity While some teachers found new opportunities in the new primary school many used strategic and micro political activity in order to cope while others fell victim to stress and burnout The authors argue that teachers own active involvement in policy change is required if their creative potential is to be realized The book will still be of interest to teachers in primary schools researchers and policy makers **Teachers Matter** Christopher Day,Pam Sammons,Gordon Stobart,Alison Kington,Qing Gu,2007-03-16 Teachers Matter offers the most definitive portrait of teachers lives and work to date At a time when teaching standards are high on the political and social agenda the quality and commitment of teaching staff is seen as paramount and they are viewed as pivotal to the economic and social well being of

society But What are the influences that help or hinder teachers commitment Is there an association between commitment and pupil attainment Why are teachers identities important What are teachers needs and concerns in different professional life phases Does school context count Based on a DfES funded study of 300 teachers in 100 primary and secondary schools in England the authors identify different patterns of influence and effect between groups of teachers which provide powerful evidence of the complexities of teachers work lives identity and commitment in relation to their sense of agency well being resilience and pupil attitudes and attainment This in turn provides a clear message for teachers teachers associations school leaders and policy makers in understanding and supporting the need to build and sustain school and classroom effectiveness The book addresses issues such as the importance of career development the relationships between school leadership culture and teachers lives maintaining a work life balance identity and well being and the connection between commitment resilience and effectiveness in the classroom Original and highly relevant Teachers Matter is invaluable reading for teachers head teachers researchers and teacher educators

Teachers' Career Trajectories and Work Lives Martin Bayer, Ulf Brinkkjaer, Helle Plauborg, Simon Rolls, 2009-06-25 The working and career lives of teachers have changed radically over the last two decades Reforms have turned education into a commodity and pupils into consumers Yet not since 1992 has there been a comprehensive overview of research findings on teachers working lives This anthology plugs the gap by collecting various scholarly contributions and perspectives on teachers career trajectories and work lives The material includes an introduction to previous research within the field presents a range of contemporary research and offers suggestions as to what lies ahead Among the contributors are leading educational academics who describe a variety of national contexts illustrating how problems and challenges relating to the teaching profession manifest themselves and are tackled in different countries The anthology also shows just how many aspects of teachers career trajectories and work lives transcend national boundaries Common international themes include stronger ties between education and the economy and a growing importance placed on how students skills relate to the perceived needs of the labour market There is also a greater degree of political interference in curriculum goals and processes and an expanding obsession with evaluation In many countries a whole generation of teachers are reaching retirement age changing the guard with a crop of new young recruits who are ever harder to attract At a time when there is an increasing focus on issues such as teacher recruitment retention and professional development this anthology offers insight and inspiration to teacher educators and educational policy makers as well as to current and prospective teachers It also aims at encouraging research into the field of teachers working lives
