Tech Decisions:

Emerging Technologies And Dynamic Decision Making Hassan Qudrat-ullah, 2025-06-24 Emerging Technologies and Dynamic Decision Making delves into the transformative role of cutting edge technologies such as AI blockchain IoT and quantum computing on decision making processes in complex fast paced environments The book is structured into four parts beginning with an introduction to these technologies and the dynamic decision making frameworks required to manage the inherent uncertainties they bring It explores how these innovations disrupt traditional models across industries reshaping everything from socioeconomic systems to governance structures The book addresses the interplay between technology and decision making providing detailed case studies from sectors like healthcare finance and emergency management It highlights the societal and ethical challenges posed by rapid technological integration such as issues of equity transparency and privacy Additionally it offers a dynamic perspective on decision support systems big data and real time analytics showing how organizations can leverage these advancements to enhance strategic outcomes Practical insights are provided through a focus on adaptive and agile decision making models which enable organizations to thrive amidst technological disruption The book concludes with strategic foresight encouraging readers to anticipate future trends and prepare for the ethical societal and economic challenges that emerging technologies will continue to introduce This book is a comprehensive guide for professionals researchers and decision makers seeking to navigate the intersection of emerging technologies and dynamic decision making frameworks

Story Tech Filippo Trevisan, Michael Vaughan, Ariadne Vromen, 2025-02-26 Personal stories have the power to stir the heart compel us to act and spark social change While advocacy organizations have long used storytelling in campaigns the role technology plays has increased Today invitations to share your story are widespread on advocacy organizations and political campaign websites calls to action and social media pages But what happens after one clicks share And how does this affect which voices we hear and which we don't in public discourse Story Tech explores the increasingly influential impact of technologies such as databases algorithms and digital story banks that are usually invisible to the public It shows that hidden story tech enables political organizations to treat stories as data that can be queried for storylines and used to intervene in news and information cycles in real time In particular the authors review successful story centered campaigns that helped change dominant narratives on disability rights marriage equality and essential workers rights in the United States and Australia They compare the use of storytelling advocacy across different types of organizations including volunteer grassroots groups large national advocacy coalitions and trade unions and examine how trends differ for storytellers organizers and their technology partners As political stories shift to being on demand they reshape power relationships in key public debates in ways that produce moments of tension as well as positive narrative change Story Tech examines these trends and illustrates how storytelling success can and should be achieved in conjunction with personal dignity privacy and empowerment for storytellers and their communities particularly marginalized ones

The Cambridge Handbook of Technical Standardization Law Jorge L. Contreras, 2017-12-14 Technical standards are ubiquitous in the modern networked economy They allow products made and sold by different vendors to interoperate with little to no consumer effort and enable new market entrants to innovate on top of established technology platforms This groundbreaking volume edited by Jorge L Contreras assesses and analyzes the legal aspects of technical standards and standardization Bringing together more than thirty leading international scholars advocates and policymakers it focuses on two of the most contentious and critical areas pertaining to standards today in key jurisdictions around the world antitrust competition law and patent law A subsequent volume will focus on international trade copyright and administrative law This comprehensive detailed examination sheds new light on the standards that shape the global technology marketplace and will serve as an indispensable tool for scholars practitioners judges and policymakers everywhere Shaping a DesignedUp Organisation Emma Carter, 2025-06-10 The special sauce that makes this book an essential reading is that in all the explanations of how to navigate the organisation she never loses sight of the fact that we are talking about humans relating to other humans Shaping a DesignedUp Organisation is in this sense truly human centred Andy Polaine Design Leadership Coach Although many organisations talk about being design driven customer centric and human centred the majority are still teetering on the periphery of understanding what this really means For many design is treated as a tick box exercise and while others might get it intellectually they don't feel or live it as designers do and yet they must if they want to lead in this competitive world Shaping a DesignedUp Organisation was born out of both love and frustration love for what design brings to people and organisations and pure frustration because it's still so hard to get many organisations to shift left on design maturity Moving organisations towards greater design maturity is not just about hiring more designers it's about a shift in mindset a commitment to seeing the world from a human centered perspective and understanding that design is more than just making things look good It's about problem solving at every level and can add value across all the points on the business start model Whether you're in product tech business or design you'll find practical ways in this book to integrate design into the heart of your organisation With this book you can make sure that design doesn't just get involved when there is UI to be designed but is involved when there is a problem and that problem impacts a human Design doesn't sit on the surface but is involved from the ground up solving the right problems balancing business goals and enhancing the human experience Growing design maturity is a team effort If you're ready to learn how to advocate for design understand its broader value or drive your organisation toward a design led approach then welcome to the journey Dive into this book and make change happen
