Students school motivation and engagement are key contributors to the quality of their academic learning and performance as well as growth in other important areas of life social emotional and physical health Fostering motivation and engagement is thus a meaningful educational purpose both in and of itself and as a pathway to holistic student development However motivation and engagement do not develop in a vacuum and effort seeking to facilitate them cannot be effectively pursued without understanding their underpinning sociocultural influences In the first edition of this volume *Big Theories Revisited* McInerney Van Etten 2004 authors of major models of school motivation and engagement were challenged to look into their theoretical work through a sociocultural lens The volume has been well received as objectively reflected in the number of citations of its chapters Significant progress has since been made in the theorizing and research of big theories of school motivation and engagement In this volume we invited a group of internationally renowned scholars to re examine their theoretical and conceptual work by highlighting the what factors and how processes of sociocultural influences in association with the key motivation and or engagement constructs of their expertise We made it clear to our contributors that we solicited new chapters rather than chapters with merely rehashed materials As a result this volume *Big Theories Revisited 2* Liem McInerney 2018 contains chapters that critically discuss sociocultural influences on school motivation and engagement constructs as viewed from focal theories including self determination theory achievement goal theory personal investment theory expectancy value theory self efficacy theory self and co regulated learning models and many others Whereas some of the chapter topics covered in the initial edition are also part of this edition some are new and provide fresh sociocultural angles on achievement relevant processes and outcomes Likewise whereas some of the authors contributed to the earlier edition of the Volume many of them are different What appears to be the same across the two editions is the scholarly distinction of the authors and the substantive rigor of the chapters in advancing our current understanding of this field of enquiry Readers will learn much from and be inspired by stimulating ideas presented in this volume **Resources in Education** ,1979 *Learning to Teach in the Secondary School* Susan Capel, Marilyn Leask, Sarah Younie, Elizabeth Hidson, Julia Lawrence, 2022-07-29 The market leading text for beginning teachers on all undergraduate postgraduate and school based routes to QTS this is an essential introduction to the key skills and knowledge needed to become a successful teacher Offering advice on all aspects of teaching and learning this ninth edition has been thoroughly updated to reflect changes in the field and covers key new topics including the science of learning online pedagogies and working with your mentor There are also expanded units on diversity and inclusion and teacher wellbeing The text includes a wealth of examples and tasks to support you in successfully applying theory to practice and in critically reflecting on and analysing your practice to maximise pupil learning The wide range of pedagogical features supports both school and university based work up to Masters level Written by experts in the field the 41 concise units are underpinned by evidence informed practice

and focus on what you need to know to thrive in the classroom including lesson planning curriculum managing behaviour online lessons and digital resources effective communication with pupils how pupils learn assessment marking and feedback diversity and inclusion special educational needs and disabilities SEND managing stress workload and time applying for jobs developing as a professional and networking The book is extended and enhanced through a companion website that includes Animated explainer videos to introduce and summarise key topics A selection of downloadable and editable tables and figures from the book so that the most practical elements can be taken out of study and into practice Additional material and interactive features to support selected units such as focus questions for lesson observations and flashcards to help analyse student behaviour Bonus content including Starting to Teach chapters and a mapping document supporting you to make links between the ninth edition chapters and key teaching standards Supported by the subject specific titles in the Learning to Teach Subjects in the Secondary School and A Practical Guide to Teaching Subjects in the Secondary School Series it is an essential purchase for every aspiring secondary school teacher
