**The Product is Docs** Christopher Gales, Splunk, Inc, 2020 This book provides a broad perspective about the essential aspects of creating technical documentation in today's product development world It is a book of opinions and guidance collected as short essays You can read selectively about subjects that interest you or you can read the entire collection in any order you like Information development is a multidimensional discipline and it is easy to theorize We have written this book from our direct experience using the concrete insights and practices we apply to our work every day If you work as an information developer a manager in a documentation team or in another part of product development that collaborates with a doc team there is information in this book for you Perhaps you are a technical writer in a small high growth company that is figuring out its processes Perhaps you are an information development manager in a large enterprise company with an expanding product line and an ever more complex matrix of cross functional dependencies You might work at a medium sized company where your management is asking you to do more with fewer people and you want some additional perspective that will help you find a leaner and more effective way to deliver what your business demands Or you might work outside the technical

documentation world in another part of product development and are wondering how to collaborate most effectively with the documentation team The purpose of The Product is Docs is to provoke discussion shine light on some murky areas and we hope inspire our colleagues to consider their processes and assumptions with new eyes Amazon [The Digital Technical Documentation Handbook](#) Susan K. Schultz, Jennifer Darrow, Frank Kavanagh, Marjorie Morse, 2014-06-28 The Digital Technical Documentation Handbook describes the process of developing and producing technical user information at Digital Equipment Corporation Discusses techniques for making user information \_more effective Covers the draft and review process the production and distribution of printed and electronic media archiving indexing testing for usability and many other topics Provides quality assurance checklists contains a glossary and a bibliography of resources for technical communicators

**Technical Documentation Best Practices - Planning and Structuring Helpful User Assistance** Marc Achtemig, 2020-10-25 Even the best information is worthless if users can't find it Providing user friendly structure and navigation is just as important as providing well written content However structuring user assistance isn't as simple and obvious as it may seem If you think that your document structure should follow the structure of your product's components and functions You're wrong If you think that the type of document that you prefer is the same type of document that your clients prefer You're wrong If you think that all the information that you have is important You're also wrong This book tells you how to structure index and link your documents so that readers actually find the information they need Topics covered General structuring principles that all structural decisions have in common Choosing media Should you provide a printed or printable user manual PDF online help or both What information should go into the user manual and what information should go into online help Which help format should you use Can context sensitive help calls be implemented Should you provide interactive features Planning documents Should you put all information into one document or should you supply several user manuals for specific purposes and user groups How should you name your documents Planning document sections What are the major sections that your documents should consist of Are there any standard sections that you mustn't forget Planning topics What types of information do your clients need How should you build and name the individual topics within the document Planning the order of sections and topics How should you organize the sections and topics within your documents What comes first What comes later Planning navigation Which navigational devices should you provide in printed documents and in online help systems Where should you provide links or cross references and where not
