Technique Discourse And Consciousness An Introduction To The Philosophy Of Jacques Ellul

Caroline Ashcroft

Technique Discourse And Consciousness An Introduction To The Philosophy Of Jacques Ellul:

Technique, Discourse, and Consciousness David Lovekin, 2022-05-19 This study examines the French thinker Jacques Ellul 1912 1994 and his historical biblical and social analyses of how technology manipulates and impoverishes modern thought culture and language In the spirit of Georg Hegel and Ernst Cassirer Ellul explores how technology begins in myths stories and religion advances to tools and then develops into data algorithms and abstract systems which are detached from human bodies and communities Efficiency then becomes an absolute in all areas of human life and the mentality of technique becomes lost in its creations These modern symbols posing as ultimate human goods and values are denigrated by technique leaving humanity awash in clichés in groundless social media and in blathering slogans that sustain the illusion that politics and culture have now become *Technology and the Contested Meanings of Sustainability* Aidan Davison, 2001-05-16

Argues that sustainability requires more than economic and technological efficiency **Understanding Jacques Ellul** Jeffrey P Greenman, Read M Schuchardt, Noah J Toly, 2013-07-25 Jacques Ellul 1912 1994 was one of the world's last great polymaths and one of the most important Christian thinkers of his time engaging the world with a simplicity sincerity courage and passion that few have matched However Ellul is an often misunderstood thinker As more than fifty books and over one thousand articles bear his name embarking on a study of Ellul's thought can be daunting This book provides an introduction to Ellul's life and work analysing and assessing his thought across the most important themes of his scholarship Readers will see that his remarkably broad field of vision clarity of focus and boldly prophetic voice make his work worth reading and considering rereading and discussing **Jacques Ellul** Jacob E. Van Vleet, Jacob Marques Rollison, 2020-04-13 Jacques Ellul 1912 1994 was Professor of the History and Sociology of Institutions at the University of Bordeaux A sociologist historian and Protestant lay theologian Ellul is primarily known for his writings on technology propaganda and Christian anarchism He influenced a wide array of thinkers including Ivan Illich William Stringfellow Thomas Merton Paul Virilio and Neil Postman In this book Jacob Van Vleet and Jacob Marques Rollison guide readers through Ellul's most influential theological and sociological writings By understanding Ellul's primary works readers will be able to clearly grasp his social theory and theological ethics profiting from his deep insight and prophetic wisdom **A New Reading of Jacques Ellul** Jacob Marques Rollison, 2020-09-10 This book presents an original and dynamic reading of the twentieth century French sociologist and theological ethicist Jacques Ellul Adopting Ellul's use of presence as a hermeneutical key to understanding his work it examines the origins of Ellul's approach to presence in his readings of Kierkegaard and the biblical book of Ecclesiastes highlights the central structural role of presence in Ellul's theological ethics and elucidates a crucial turning point in Ellul's theology following a personal crisis in Ellul's faith and life Drawing from numerous unpublished and untranslated texts Jacob Marques Rollison argues that this crisis involves confrontation with a critique of presence manifest in Ellul's reading of and engagement with Michel Foucault Marques Rollison distills Ellul's sociological critiques and theological responses to this

crisis presenting Ellul's evolving theology against the background of major shifts in French intellectual life. In doing so the author simultaneously calls for renewed engagement with Ellul's prophetic thought, critically appraises Ellul's dialectical theology and Marxist inheritances, and develops a robustly Protestant approach to theological communication ethics for our time.

Jacques Ellul on Violence, Resistance, and War

Jeffrey M. Shaw, Timothy J. Demy, 2016-04-12
The last few decades seem to have ushered in new levels of violence challenging the notion that our globalized interconnected world offers increased prospects for cooperation and peace. Many philosophers and theologians have offered various reasons for why this might be so, but none has come so close as the French philosopher Jacques Ellul to providing a comprehensive explanation for many of the pitfalls inherent in increasing levels of technological advance. The chapters in this book explore the phenomena of violence, terrorism, and war through the lens of Ellul's thought. Readers unfamiliar with Ellul will find as much to consider in these chapters as those who have studied Ellul extensively, and for both the novice and the expert, this book offers an opportunity to both evaluate and reevaluate Ellul's extensive thought on matters of importance to contemporary society.

Volume 11, Tome II: Kierkegaard's Influence on Philosophy

Jon Stewart, 2016-12-05
Kierkegaard's relation to the field of philosophy is a particularly complex and disputed one. He rejected the model of philosophical inquiry that was mainstream in his day and was careful to have his pseudonymous authors repeatedly disassociate themselves from philosophy. But although it seems clear that Kierkegaard never regarded himself as a philosopher, there can be no doubt that his writings contain philosophical ideas and insights and have been profoundly influential in a number of different philosophical traditions. The tomes in this volume seek to document the different traditions of the philosophical reception of Kierkegaard's thought, and the articles demonstrate the reach of Kierkegaard's writings in philosophical contexts that were often different from his own. The present volume attempts to document these different traditions of the philosophical reception of Kierkegaard's thought. The articles featured here aim to demonstrate the vast reach of Kierkegaard's writings in philosophical contexts that were often quite different from his own. Tome II is dedicated to exploring Kierkegaard's influence on Francophone philosophy. The French intellectual tradition squares well with Kierkegaard's eclectic profile, since its leading figures are often difficult to classify unambiguously as philosophers, theologians, literary critics, or simply writers. Kierkegaard's thinking was highly influential for many generations of French philosophers right up to the present. It was not just existentialism that tried to co-opt Kierkegaard for its own purposes; he has also been influential in the context of almost every modern school of French thought: phenomenology, feminism, structuralism, post-structuralism, semiotics, and deconstruction.

Dialectical Theology and Jacques Ellul
Jacob E. Van Vleet, 2014-09-01
Jacob E. Van Vleet argues that the work of Jacques Ellul is frequently misread on account of inattention to the theological underpinning that governs Ellul's thought. In a penetrating analysis, the first of its kind, Van Vleet provides a substantive account of the theological structure of Ellul's work and demonstrates the determinative role that theology plays in a proper

understanding of Ellul The book offers a major introduction to Ellul's thought his contribution to theology and philosophy and how his philosophy of technology is both theologically informed and culturally relevant *Hope in the Thought of Jacques Ellul* Lawrence J. Terlizzese, 2005-10-30 Hope expresses more than an area of concentration in Ellul's thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction **Encyclopedia of Modern French Thought** Christopher John Murray, 2013-01-11 In this wide ranging guide to twentieth century French thought leading scholars offer an authoritative multi disciplinary analysis of one of the most distinctive and influential traditions in modern thought Unlike any other existing work this important work covers not only philosophy but also all the other major disciplines including literary theory sociology linguistics political thought theology and more *Catastrophic Technology in Cold War Political Thought* Caroline Ashcroft, 2024-11-30 In the mid twentieth century a certain idea of technology emerged in the work of many influential political theorists a critical catastrophic concept of technology entangled with the apocalyptic fears fuelled by two all consuming world wars and the looming nuclear threat Drawing on the work of theorists such as Hannah Arendt Jacques Ellul Martin Heidegger and Herbert Marcuse *Catastrophic Technology in Cold War Political Thought* explores the critical idea of technology as both a response to a dramatically changing world and a radical political critique of Cold War liberalism **Illusions of Freedom** Jeffrey M. Shaw, 2014-06-02 *Illusions of Freedom* examines the opinions and ideas of two twentieth century writers Thomas Merton a Catholic monk living in the United States and Jacques Ellul a French Protestant Contemporaries they never met or corresponded with each other but their critique of the influence that technology was beginning to have on the human condition is strikingly similar Both Merton and Ellul drew upon the ideas of others in formulating their worldview to include Karl Barth Søren Kierkegaard Aldous Huxley and Karl

Marx Jeffrey Shaw examines the influence that these other philosophers had on Merton and Ellul as they formulated their own ideas on technology's impact on freedom. Tracing the similarities and in some cases the differences between their critiques of technology and the idea that progress is always to be seen as something inherently good, one finds that they bring a unique perspective to the debate and offer readers an alternative avenue for reflecting on the meaning of technology and its impact on our lives in the twenty-first century.

Kierkegaard and the Question Concerning Technology Christopher B. Barnett, 2019-08-22 Over the last several decades, technology has emerged as an important area of interest for both philosophers and theologians. Yet despite his status as one of modernity's seminal thinkers, Søren Kierkegaard is not often seen as one who contributed to the field. *Kierkegaard and the Question Concerning Technology* argues otherwise. Christopher B. Barnett shows that many of Kierkegaard's criticisms of the present age relate to the increasing dominance of technology in the West, and he puts Kierkegaard's thought in conversation with subsequent thinkers who grappled with technological issues from Martin Heidegger to Thomas Merton. Barnett shows that Kierkegaard's writing, with its marked emphases on personal upbuilding, stands as a place where deeper, non-technical modes of thinking are both commended and nurtured. In doing so, Barnett presents a Kierkegaard who remains relevant, perhaps all too relevant, in today's digital age.

The Panoptic Sort Oscar H. Gandy Jr., 2021-06-04 The Panoptic Sort was an important contribution to contemporary understanding of the collection, processing, and use of personal information within the corporate sector. It represented a critical shift within the developing area of surveillance and privacy studies. This second edition features an updated Foreword focusing on developments within this field since its initial publication in 1993. The Afterword explores the possibilities for the mobilization of an engaged public, willing and able to call for the establishment of limitations on the use of algorithmically processed data in ways that threaten the democratic process.

Political Illusion and Reality David W. Gill, David Lovekin, 2018-09-27 Are all governments east and west Muslim and secular, authoritarian and constitutional, Republican and Democratic, fundamentally the same, all of them under the extraordinary growing power of technique and bureaucracy? Is all politics then just an illusory affair of lies, deception, propaganda, partisan passions, and chaos on the surface of government and party? In his vast and penetrating writings, Bordeaux sociologist Jacques Ellul (1912-1994) points in those directions. *Political Illusion and Reality* is a collection of twenty-three essays on Ellul's political thought. Veteran as well as younger Ellul scholars, political leaders, activists, and pastors discuss aspects of Ellul's thought as they relate to their own fields of study and political experience. Beginning with his 1936 essay *Fascism: Son of Liberalism*, translated and published here in English for the first time, Ellul and these authors will provoke readers to think some new thoughts about politics and government and think more deeply about the main issues we face in our politically divided and troubled times.

Technology and the Good Life? Eric Higgs, Andrew Light, David Strong, 2010-12-15 Can we use technology in the pursuit of a good life, or are we doomed to having our lives organized and our priorities set by the demands of machines and systems? How can philosophy help us to make

technology a servant rather than a master Technology and the Good Life uses a careful collective analysis of Albert Borgmann's controversial and influential ideas as a jumping off point from which to address questions such as these about the role and significance of technology in our lives Contributors both sympathetic and critical examine Borgmann's work especially his device paradigm apply his theories to new areas such as film agriculture design and ecological restoration and consider the place of his thought within philosophy and technology studies more generally Because this collection carefully investigates the issues at the heart of how we can take charge of life with technology it will be a landmark work not just for philosophers of technology but for students and scholars in the many disciplines concerned with science and technology studies

Technofutures, Nature and the Sacred Celia Deane-Drummond, Sigurd Bergmann, Bronislaw Szerszynski, 2016-03-03 The capacity of human beings to invent construct and use technical artifacts is a hugely consequential factor in the evolution of society and in the entangled relations between humans other creatures and their natural environments Moving from a critical consideration of theories to narratives about technology and then to particular and specific practices Technofutures Nature and the Sacred seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology religion and society and using insights from the environmental humanities It works from both theoretical and practical contexts by using newly emerging case studies including geo engineering and soil carbon technologies and breaks open new ground by engaging theological scientific philosophical and cultural aspects of the technology religion nature nexus Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies and engaging critical theory common in sociological political and literary discourses the authors explore the implicit religious claims embedded in technology

Participatory Democracy, Science and Technology K. Rogers, 2015-12-11 Taking insights from the philosophy of science and technology theories of participatory democracy and Critical Theory the author tackles and explores how democratic participation in scientific research and technological innovation could be possible as a deliberative means of improving the rational basis for the development of modern society

Confronting Technology Matthew T. Prior, 2020-03-16 We are living through a digital revolution which already touches every area of life and will continue to shape the future in as yet unforeseen ways Digital technologies are an ordinary part of daily life and yet they also present an unprecedented challenge to Christians to articulate a biblical theological framework to navigate times of rapid change The work of the French theologian Jacques Ellul is a theological time bomb primed for times like these Accounts of Ellul's career often divide off his sociology and theology but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God tackling the phenomenon he named technique the pursuit of maximal power and efficiency implicit in the technological enterprise with a profound depth of biblical and ethical insight Centering himself on the apocalypse or revelation of Jesus Christ in history Ellul offers a monumental timely though far from flawless contribution to contemporary ethical debates about the uses and abuses

of technologies His work blazes a trail that Christians and all concerned for the future would do well to follow as we avoid both the naivety of technological neutrality and the dread of technological determinism **Reinventing Protestant Germany** Brandon Bloch, 2025 Brandon Bloch examines the remarkable transformation of German Protestantism after WWII As avid nationalists and militarists Protestant leaders had largely backed the Nazi regime Yet after 1945 they reinvented themselves as champions of constitutional democracy and human rights while also seeking to whitewash the Church's past
