Techniques For Ensuring Pr Coverage In The Regional Media An In:

Techniques for Ensuring PR Coverage in the Regional Media Mike Imeson, 1998 The regional media are vibrant and growing attracting bigger and better audiences and producing better programmes and better publications offering substantial PR opportunities at every level But opportunities are often missed partly because the PR industry often underplays the potential impact the regions can have and still considers that national media coverage is sufficient This is short sighted Even the simplest campaign will achieve more space and airtime in the regions if the requirements and attitudes of those in the regional media are considered at an early stage Some of the best national PR coups have started in a home town weekly or evening newspaper later picked up by local freelancers Once syndicated nationally they can multiply with surprising ease Specific knowledge and methods are required You shouldn't be using the same methods you apply on the national circuit they just won't work This in depth Briefing will give you the tools and techniques you need to enjoy the opportunities offered by the regional and local media It offers you practical guidance and advice on how to apply them with maximum effect for your next PR campaign A Guidebook for Riverside Regeneration Frank Bothmann, Rudolf

Air Transport Provision in Remoter Regions Svein Bråthen, 2016-03-23 This book stems from a series of biennial conferences devoted to issues affecting air transport provision in remoter regions that have been organized by the Centre for Air Transport in Remoter Regions at Cranfield University The primary aim of the conferences has been to provide an opportunity for those responsible for operating managing regulating and financing air transport services and associated infrastructure in these areas to be informed of the latest best practice initiatives to contrast different policy approaches and to debate potential solutions to perennial problems Remoter regions has been a neglected area of air transport as much of the focus of public and media attention is on the larger airlines airports and aircraft While the number of large airports in the world is in the hundreds there are many thousands of smaller airports providing communities all over the globe with vital air links More often than not these services and the airports to which they are operated are loss making and require subsidies to sustain them There are therefore many more interested parties involved in both providing and deciding issues relating to the provision of air transport in these situations most especially central regional and local governments who are charged with financing these activities The book contains 17 chapters from experts in remote region air transport within the following 5 sections Key economic and socio economic issues Subvention mechanisms Route development initiatives Infrastructure provision Issues affecting the provision of air services in remoter regions *Public Relations and Media in Cooperatives: An*
