Techniques in Teaching Writing, 1993

Inside Out Dan Kirby, Dawn Latta Kirby, Tom Liner, 2004 It all begins inside inside the heads of our kids There are ideas in there and language and lots of possibilities Writing is a pulling together of that inside stuff Writing is a rehearsal in meaning making The teacher s role in all this is to support those rehearsals The first edition of this popular textbook was born out of notes such as this that a young professor and a young high school teacher wrote to each other about the teaching of writing Dan Kirby and Tom Liner surprised themselves and the rest of academia by writing a book that other teachers found to be both entertaining and useful The first and second editions of Inside Out have helped both preservice and in service teachers to implement practical and authentic teaching techniques in their classrooms for the last twenty plus years Now the long awaited third edition is at hand this time with the addition of Dawn Latta Kirby s insightful work based on nearly 30 years of experience in teaching writing Together the three authors have thoroughly updated Inside Out with the latest information on technology a substantial reference section on resources and loads of new examples And they have gone a step further they have rethought their fundamental assumptions about literacy and learning to write and have incorporated this innovative thinking into two new opening chapters and additional revisions throughout the book They have introduced fresh concepts overhauled some chapters and added new ones so that the third edition includes completely new material in the chapter on expository writing an updated chapter on poetry additional ideas about using portfolios publishing student writing with and without computers and working with young adult literature all new resources in a chapter by Karen Hartman Director of the Colorado Writing Project Still irreverent and skeptical of the conventional wisdom about teaching and learning still abhorring corporate strength writing pedagogies these authors echo the voices of many teachers who remain committed to teaching to

the needs of their students Most of all they give teachers the means to prove their belief that learning to write is not just for the few or the gifted

Teaching Writing in the Content Areas Vicki Urquhart, Monette McIver, 2005-05-15 Most educators intuitively understand the critical relationship between thinking and writing writing allows us to express what we think but the very act of writing spurs a process of exploration that changes our thinking and helps us learn Teaching Writing in the Content Areas examines nearly 30 years of research to identify how teachers can incorporate writing instruction that helps students master the course content and improve their overall achievement Building on the recommendations of the National Commission on Writing authors Vicki Urquhart and Monette McIver introduce four critical issues teachers should address when they include writing in their content courses Creating a positive environment for the feedback and guidance students need at various stages including prewriting drafting revising and editing Monitoring and assessing how much students are learning through their writing Choosing computer programs that best enhance the writing process Strengthening their knowledge of course content and their own writing skills The authors also provide 35 classroom strategies practices and handouts that teachers can easily implement in most subject areas or grade levels From prewriting guides and work sheets to instructional guidance and analysis the strategies offer realistic options to help teachers tailor writing assignments and instruction to the needs of each class Teaching Writing in the Content Areas is more than a primer for teaching the mechanics of writing it is a research based guide to regularly engaging students in writing that pushes them to express themselves clearly to explore new ideas and to become critical thinkers

The Writing Revolution Judith C. Hochman,Natalie Wexler,2017-08-07

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution TWR provides a clear method of instruction that you can use no matter what subject or grade level you teach The model also known as The Hochman Method has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback Insurmountable as the challenges faced by many students may seem The Writing Revolution can make a dramatic difference And the method does more than improve writing skills It also helps Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing There s no separate writing block and no separate writing curriculum Instead teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction But perhaps what s most revolutionary about the TWR method is that it takes the mystery out of learning to write well It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content
