Ward, 2025-09-01 As the first geographical study of interwar Britain The Geography of Interwar Britain originally published in 1988 and now with a new preface by the author breaks new ground incorporating original research and new interpretations of the work of historians and others within a geographical frame of reference The central argument of the book is that the state in interwar Britain intensified uneven capitalist development State actions in many important fields including macro economic policy defence industrial rationalisation labour and unemployment policy local government and regional policy are analysed in detail These studies show that until the later 1930s state policies worked to the disadvantage of depressed outer Britain and favoured the more prosperous south and midlands However shifts in state policies were apparent as rearmament and changes in macro economic policies necessitated new approaches Significantly the first stages in the creation of what became the post 1945 political consensus were evident at this time particularly in regional and industrial location policy The book will be of interest to geographers economic and social historians political scientists sociologists and planners *The Advance of African Capital* Tom G. Forrest, 1994 Combining ethnographic and historical perspectives Tom Forrest examines the strategies and patterns of development employed by business people from the colonial period to the present Through a series of highly readable case studies he provides a broad picture of the various forms of capital accumulation and sectoral advances in trade transport manufacture agriculture finance and other services These are set within the context of changing economic opportunities shifts in power and policy relations with foreign capital and attitudes towards private business and the state Monographic Series Library of Congress, 1979 **Business Groups in the West** Asli M. Colpan, Takashi

Hikino,2018-02-15 This volume aims to explore the long term evolution of different varieties of large enterprises in today's developed economies. It focuses on the economic institution of business groups and attempts to comprehend the factors behind their rise, growth, struggle, and resilience, their behavioral and organizational characteristics, and their roles in national economic development. The volume seeks to enhance the scholarly and policy-oriented understanding of business groups in developed economies by bringing together state-of-the-art research on the characteristics and contributions of large enterprises in an evolutionary perspective. While business groups are a dominant and critical organization model in contemporary emerging economies and have lately attracted much attention in academic circles and business presses, their counterparts in developed economies have not been systematically examined. This book aims to fill this gap in the literature and is the first scholarly attempt to explore the evolutionary paths and contemporary roles of business groups in developed economies from an internationally comparative perspective. In doing so, it argues that business groups actually rose to function as a critical factor of industrial dynamics in the context of the Second Industrial Revolution in the late nineteenth century. They have adapted their characteristic roles and transformed to fit the changing market and institutional settings. As they flexibly co-evolve with the environment, the volume shows that business groups can remain as a viable organization model in the world's most advanced economies today. **American Book Publishing Record**, 1983-04
