Success and Failure of Countries at the Olympic Games Danyel Reiche, 2016-07-01 The Olympic Games is undoubtedly the greatest sporting event in the world with over 200 countries competing for success. This important new study of the Olympics investigates why some countries are more successful than others. Which factors determine their failure or success? What is the relationship between these factors? And how can these factors be manipulated to influence a country's performance in sport? This book addresses these questions and discusses the theoretical concepts that explain why national sporting success has become a policy priority around the globe. Danyel Reiche reassesses our understanding of success in sport and challenges the conventional explanations that population size and economic strength are the main determinants for a country's Olympic achievements. He presents a theory of countries' success and failure based on detailed investigations of the relationships between a wide variety of factors that influence a country's position in the Olympic medals table, including geography, ideology, policies such as focusing on medal promising sports, home advantage and the promotion of women. This book fills a long-standing gap in literature on the Olympics and will provide valuable insights for all students, scholars, policy makers and journalists interested in the Olympic Games and the wider relationship between sport, politics and nationalism.

Celebration Capitalism and the Olympic Games Jules Boykoff, 2013-08-15 The Olympic Games have become the world's greatest media and marketing event, a global celebration of exceptional athletics gilded with corporate cash. Huge corporations vie for association with the Olympic Image in the hope of gaining a worldwide marketing audience of billions. In this provocative critical study of the contemporary Olympics, Jules Boykoff argues that the Games have become a massive planned economy designed to shield the rich from risk while providing them with a spectacle to treasure. Placing political economy at the center of the analysis and drawing on interdisciplinary research in sociology, politics, geography, history and economics, Boykoff develops an innovative theory of celebration capitalism, the manipulation of state actors as partners that drives us towards public-private partnerships in which the public pays and the private profits. He argues that the Athens Games in 2004 marked the full emergence of celebration capitalism, with London 2012 representing its quintessential expression, characterized by a state of exception.
