Benjamin Cheever, 2007-09-18 Acclaimed novelist Benjamin Cheever author of *The Plagiarist* *Famous After Death* and *The Good Nanny* brings his buoyant literary style to this impassioned memoir about the sport that changed his life From Pheidippides who ran the first marathon in 490 BC bringing news to Athens of the Greek victory on the plains of Marathon to our own soldiers in Iraq today running is an integral part of human culture and legend In *Strides* heralded author Benjamin Cheever explores the role of running in human history while interspersing this account with revelations of his own decades long devotion to the sport Cheever has traveled the world writing features for *Runner's World* magazine and he draws from this rich experience on every page His adventures have taken him to Kenya in search of the secrets of the world's fastest long distance runners and to a 10 K race with American soldiers in Baghdad Cheever celebrates the quotidian personal satisfaction of a morning run and the more exotic pleasures of the Medoc Marathon in Bordeaux where fine wines are served at water stations and the first prize is the winner's weight in grand crus He shares vivid moments from the New York Marathon and waxes rhapsodic about the granddaddy of American distance events the Boston Marathon But what truly distinguishes *Strides* as a memorable read is the unique lens through which this sparkling writer explores our deep bond to running an experience he likens to that of being able to fly [Running Crazy - Imagine Running a Marathon. Now Imagine Running Over 100 of Them. Incredible True Stories from the World's Most Fanatical Runners](#)

Helen Summer, 2013-04-15 Pheidippides did it once and became a legend Brian Mills did it 771 times but you might be forgiven for not knowing who he is He is a runner and it is the marathon all 26 miles and 385 yards of it and for some people once is not enough Brian Mills is rumoured to have a butterfly tattoo for each of his 771 efforts And Brian is not the only one who has notched up three digits of grueling athletic endeavor The 100 Marathon Club also known as the Hell's Angels of Running and Running Sluts running one race whilst thinking of another is growing in number every year This is a club with no prejudices and only one prerequisite for membership the completion of 100 marathons It is full of colourful contrasting characters with idiosyncratic personalities and diverse lifestyles They make up a gargantuan melting pot of humanity linked by one common desire to run

and run and run But who would want to run 100 marathons or more And why How do they find the time the money the energy Are they crazy Or just passionate Find out by reading their stories Some will make you laugh others will make you cry some may even inspire you to run a marathon Believe it or not these are ordinary everyday people like you Although when you have finished laughing and crying you may still not be sure whether they are crazy or passionate But you as they do when they run will have a lot of fun along the way

Murray, 2022-09-15 Long Hard Road The Lithium Ion Battery and the Electric Car provides an inside look at the birth of the lithium ion battery from its origins in academic labs around the world to its transition to its new role as the future of automotive power It chronicles the piece by piece development of the battery from its early years when it was met by indifference from industry to its later emergence in Japan where it served in camcorders laptops and cell phones The book is the first to provide a glimpse inside the Japanese corporate culture that turned the lithium ion chemistry into a commercial product It shows the intense race between two companies Asahi Chemical and Sony Corporation to develop a suitable anode It also explains for the first time why one Japanese manufacturer had to build its first preproduction cells in a converted truck garage in Boston Massachusetts Building on that history Long Hard Road then takes readers inside the auto industry to show how lithium ion solved the problems of earlier battery chemistries and transformed the electric car into a viable competitor Starting with the Henry Ford and Thomas Edison electric car of 1914 it chronicles a long list of automotive failures then shows how a small California car converter called AC Propulsion laid the foundation for a revolution by packing its car with thousands of tiny lithium ion cells The book then takes readers inside the corporate board rooms of Detroit to show how mainstream automakers finally decided to adopt lithium ion Long Hard Road is unique in its telling of the lithium ion tale revealing that the battery chemistry was not the product of a single inventor nor the dream of just three Nobel Prize winners but rather was the culmination of dozens of scientific breakthroughs from many inventors whose work was united to create a product that ultimately changed the world
