The Open Texture Of Moral Concepts

Raymond Apthorpe, Des Gasper

The Open Texture Of Moral Concepts:

The Open-Texture of Moral Concepts J. M. Brennan, 1977 **The Open-texture of Moral Concepts** J. M. Brennan, 1977 **Moral Action and Christian Ethics** Jean Porter, 1999-03-11 How do we determine whether an action is right or wrong Until recently philosophers assumed that this question could be answered by means of a theory of morality which set forth clearly established rules for moral behaviour More recently however a number of philosophers have challenged a theory of morality in this sense Porter is sympathetic to their criticisms but questions whether they go far enough in offering a positive alternative to a modern view of the moral act She argues that the work of Aquinas offers an alternative account of moral rationality in terms of which moral reasoning is understood as dialectical rather than deductive and questions are resolved in a wider context of ethical thought Aquinas's account of the moral virtues and prudence is seen to offer unexpected insights into the relationship between moral rules and the practice of the virtues thus contributing to our own moral reflection **The Scope of Morality** Peter A. French, 1979 The Scope of Morality was first published in 1980 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions The scope of morality Peter A French contends is much narrower than many traditional and contemporary works in ethical theory suggest We trivialize morality if we think it has something to say about everything we do it touches us all but not at all times This essay in philosophical ethics focuses upon the origin purpose and function of the various concepts to be found in a more or less mature morality The author draws a distinction between moral concepts that arise from an individual's wish to live a worthwhile life and those directed towards the development of virtue in the moral community Moral concepts in his view are subjective creations of human beings rather than laws with an objective basis in nature The ethics of sociobiology of the lifeboat and spaceship models and of game theory all come under his critical eye in this useful and progressive work The Scope of Morality says Hector Neri Castaneda represents a serious effort at discussing the nature of morality taking into account the most important contributions of recent writers Contemplating the Future of Moral Theology Robert C. Koerpel, Vimal Tirimanna, 2017-05-18 Professor Brian V Johnstone CSSR has been quietly and unobtrusively contributing to the intellectual life of Catholicism especially in the field of moral theology for nearly four decades Having published numerous theological articles on many topics including biomedical ethics peace and war and fundamental moral theology and directed many doctoral dissertations it is no exaggeration to say that he has dedicated his entire life to teaching and writing theology In honor of Johnstone's work this felicitation volume covers a wide range of themes in the Christian moral life with original articles written by internationally recognized theologians In the spirit of Johnstone's thought and work each article challenges the reader to reflect upon the present while contemplating the future of moral theology The Myth of Liberalism John P. Safranek, 2015-09-09 Individual freedom looms large in political and ethical thought Nevertheless the

theoretical foundations underlying modern liberalism continue to be contested by proponents and opponents alike The Myth of Liberalism offers a unique contribution to this debate by following through on the often underdeveloped suggestion that liberal principles are untenable because they are self contradictory By analyzing and ultimately refuting each of the proposed underpinnings of liberalism liberty equality rights privacy autonomy or dignity Safranek concludes that contemporary liberalism is a myth it is not a coherent political philosophy as much as a collection of causes masked by emotively potent political rhetoric

Ethics in Planning Martin Wachs, 2017-07-28 Some planners limit discussions of ethics to simple though important questions about the propriety of their daily activities This approach to ethics restricts discussion of professional ethics to the propriety of everyday social and professional relationships It ignores the broader ethical content of planning practice methods and policies While narrow definitions of ethical behavior can easily preoccupy public officials and professional associations they divert attention from more profound moral issues Martin Wachs argues that ethical issues are implicit in nearly all planning decisions For illustrative and educational reasons it is useful to divide ethics in planning into four distinct categories The first category includes the moral implications of bureaucratic practices and rules of behavior regarding clients and supervisors The second category includes ethical judgments which planners make in exercising their administrative discretion More complex and represented by a third category are the moral implications of methods and the ethical content of criteria built into planning techniques and models The final type represents the basic choices which society makes those inherent in the consideration of major policy alternatives Ethics in Planning contains a variety of representative papers to capture the current state of thinking This book will be important as a text for survey classes in professional ethics given by university planning programs It should also supplement short courses in planning ethics for practicing professionals and provide source materials for discussions of planning ethics sponsored by local chapters of the American Planning Association and similar organizations It gathers together exemplary and critical works thus it will also interest individual planners in a field that only continues to grow in recognition and importance

Speaking of Equality P. Westen, 2014-07-14 Aristotle noted that equality is the plea not of those who are satisfied but of those who seek change and the word has long been invoked in the name of social reform It retains its force because arguments for equality put arguments for inequality on the defensive But why is equality laudatory and inequality pejorative In this first book length analysis of the rhetorical force of equality arguments Peter Westen argues that they derive their persuasiveness largely from the kind of word that equality is rather than from the values it incorporates By focusing on ordinary language and using commonplace examples from law and morals Westen argues that equality is a single concept that lends itself to a multiplicity of conceptions by virtue of its capacity to incorporate diverse standards of comparison by reference Equality arguments draw rhetorical force in part from their tendency to mask the standards of comparison on which they are based and in so doing to confound fact with value premises with conclusions and uncontested with contested norms Originally published in 1990 The Princeton Legacy Library

uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Maat, the Moral Ideal in Ancient Egypt Maulana Karenga, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company

Hart's Legal Philosophy Michael D. Bayles, 1992-11-30 This work presents interprets and largely defends the legal philosophy of H L A Hart except for his account of causation Hart is considered by many persons to be the most important English writer on jurisprudence in the 20th century The book considers his general theory of law his theory of rights and of the enforcement of morality and his analysis of the conditions of legal responsibility and the justification of punishment

Freedom and Rationality F. D'Agostino, Ian Jarvie, 2012-12-06 x philosophy when he inaugurated a debate about the principle of methodological individualism a debate which continues to this day and which has inspired a literature as great as any in contemporary philosophy Few collections of material in the general area of philosophy of social science would be considered complete unless they contained at least one of Watkins's many contributions to the discussion of this issue In 1957 Watkins published the first of a series of three papers 1957b 1958d and 1960a in which he tried to codify and rehabilitate metaphysics within the Popperian philosophy placing it somewhere between the analytic and the empirical He thus signalled the emergence of an important implication of Popper's thought that had not to that point been stressed by Sir Karl himself and which marked off his followers from the antimetaphysical ideas of the regnant logical positivists In 1965 years of work in political philosophy and in the history of philosophy in the seventeenth century were brought to fruition in Watkins's widely cited and admired Hobbes's System of Ideas 1965a second edition 1973d This book is an important contribution not just to our understanding of Hobbes's political thinking but perhaps more importantly to our understanding of the way in which a system of ideas is constituted and applied Watkins built on earlier work in developing an account of Hobbes's ideas in which was revealed and clarified the unity of Hobbes's metaphysical epistemological and political ideas

Community and Communitarianism Haig A. Khatchadourian, 2011-06-29 Community and Communitarianism presents and defends in detail a care centered ideal of a good and moral community a form of social organization imbued with the virtues of a care centered ethic such as cooperation in teleological communities cooperation in the realization of communal goals mutual concern and solidarity sympathy and empathy benevolence a spirit of sacrifice and affection love and caring It is argued that a care centered ethic hence a care centered community needs to be constrained and fortified by equal respect for the participants basic human right to be treated as moral subjects together with fair and just treatment Besides contributing to social philosophy the book contributes significantly to ethics

Arguing Development Policy Raymond Apthorpe, Des Gasper, 2014-06-23 This collection shows how policy discourses in the fields of

national and international developments are constructed and operate and how they can be analysed Dominant discourses screen out certain aspects they frame issues to include some matters and typically exclude important others More generally different policy discourses construct the world in distinctive ways through language that requires deconstruction and careful review

Conceptual Tension Leon J. Goldstein, 2014-11-12 *Conceptual Tension Essays on Kinship Politics and Individualism* is a critical philosophical examination of the role of concepts and concept formation in social sciences Written by Leon J Goldstein a preeminent Jewish philosopher who examined the epistemological foundations of social science inquiry during the second half of the twentieth century the book undertakes a study of concept formation and change by looking at the four critical terms in anthropology kinship politics parliament and Rousseau's concept of the general will and sociology individualism The author challenges prevailing notions of concept formation and definition specifically assertions by Gottlieb Frege that concepts have fixed clear boundaries that are not subject to change Instead drawing upon arguments by R G Collingwood Goldstein asserts that concepts have a historical dimension with boundaries and meanings that change with their use and context Goldstein's work provides insight for philosophers historians political scientists anthropologists and Judaica scholars interested in the study and meaning of critical concepts within their fields

[Karl Barth and Christian Ethics](#) William Werpehowski, 2016-04-22 This critical study of Karl Barth's Christian theological ethics discusses Barth's controversial and characteristically misunderstood ethics of divine command The surprising relation of his divine command ethics to contemporary narrative theology and virtue ethics and specific moral themes concerning bonds between parents and children the nature of truth telling and the meaning of Christian love of God and neighbor are all discussed This book reveals Barth's richness depth and insight and places his work in constructive connection with salient themes in both Catholic and Protestant ethics Attentive to the fullness of Barth's Christological vision and to the purposes and limits of his reflections on the Christian life in pursuit of the good William Werpehowski also advances conversations in Christian ethics about the nature of practical deliberation and decision the orientation and dispositions that embody moral faithfulness and the question and features of natural morality

Terror, Religion, and Liberal Thought Richard B. Miller, 2010-09-23 Religious violence may trigger feelings of repulsion and indignation especially in a society that encourages toleration and respect but rejection contradicts the principles of inclusion that define a democracy and its core moral values How can we think ethically about religious violence and terrorism especially in the wake of such atrocities as 9 11 Known for his skillful interrogation of ethical issues as they pertain to religion politics and culture Richard B Miller returns to the basic tenets of liberalism to divine an ethical response to religious extremism He questions how we should think about the claims and aspirations of political religions especially when they conflict so deeply with liberal norms and practices and he suggests how liberal critics can speak confidently in ways that respect cultural and religious difference Miller explores other concerns within these investigations as well such as the protection of human rights and a liberal democratic commitment to

multicultural politics In relating religion and ethics he develops a new lens for viewing political religions and their moral responsibilities This probing inquiry also forces us to rethink our response to 9 11 Dilemmas and Decisions Patrick F. Miller,2018-04-16 In Dilemmas and Decisions the author argues that dilemmas medical political and personal are clearly universal requiring decisions with a painful choice Nevertheless we are witnessing an increasing tendency amongst opinion leaders from management consultants to religious fundamentalists to inform us that dilemmas either do not really exist or are merely problems awaiting the right solution which they happen to possess Such moral certainty is dangerously mistaken breeding extremism and undermining democratic values Education can become a kind of preparation for Multiple Choice Question type exams or TV quizzes with facts recalled under pressure of time and problems needing fast solutions Problems however are different from dilemmas they have solutions and disappear as soon as these are found Dilemmas leave you with an aftertaste and a sense of regret about the rejected alternative The Dynamics of Law and Morality Wibren van der Burg,2016-03-23 This book investigates the dynamic intertwinement of law and morality with a focus on new and developing fields of law Taking as its starting point the debates and mutual misunderstandings between proponents of different philosophical traditions it argues that this theoretical pluralism is better explained once law is accepted as an essentially ambiguous concept Continuing on the book develops a robust theory of law that increases our grasp on global legal pluralism and the dynamics of law This theory of legal interactionism inspired by the work of Lon Fuller and Philip Selznick also helps us to understand apparent anomalies of modern law such as international law the law of the European Convention on Human Rights and horizontal interactive legislation In an ecumenical approach legal interactionism does justice to the valuable core of truth in natural law and legal positivism Shedding new light on familiar debates between authors such as Fuller Hart and Dworkin this book is of value to academics and students interested in legal theory jurisprudence legal sociology and moral philosophy Ethics and Philosophical Critique in William James Sarin Marchetti,2015-08-25 Marchetti offers a revisionist account of James s contribution to moral thought in the light of his pragmatic conception of philosophical activity He sketches a composite picture of a Jamesian approach to ethics revolving around the key notion and practice of a therapeutic critique of one s ordinary moral convictions and style of moral reasoning **The Sociology of Belief (Routledge Revivals)** Keith Dixon,2013-12-19 First published in 1980 this book presents a study of knowledge and the patterns of social and scientific thought Keith Dixon argues that traditional and contemporary formulations of the sociology of knowledge involve a series of fallacies and the claim to reduce knowledge to ideology devalues the role of reasoned inquiry Chapters discuss such areas as the theories of Marx and Mannheim the sociology of science and of religious belief With a detailed conclusion analysing the foundations and limits of the sociology of knowledge this reissue will provide an interesting and useful analysis for students of Sociology

The Open Texture Of Moral Concepts Book Review: Unveiling the Power of Words

In a world driven by information and connectivity, the power of words has become more evident than ever. They have the capability to inspire, provoke, and ignite change.
