The Handbook Of Economic And Financial Measures:

The Handbook of Economic and Financial Measures Frank J. Fabozzi, Harry I. Greenfield, 1984 The Economics of Financial Reform in Developing Countries Wilbert O. Bascom, 2016-07-27 Developing countries financial sector has been affected by a troubled macroeconomic environment and repressive policies To improve their financial sector performance some governments have responded with financial reform policies which have succeeded in only a few but failed in several countries This book identifies the challenges and solutions for policymakers and financial managers in countries implementing financial reform policies It analyzes the anatomy of success and failure of reform and argues for sound financial regulation and supervision in these countries **Cost Structure and the Measurement of Economic Performance** Catherine J. Morrison Paul, 1999-02-28 Cost Structure and the Measurement of Economic Performance is designed to provide a comprehensive guide for students researchers or consultants who wish to model construct interpret and use economic performance measures The topical emphasis is on productivity growth and its dependence on the cost structure The methodological focus is on application of the tools of economic analysis the thinking structure provided by microeconomic theory to measure technological or cost structure and link it with market and regulatory structure This provides a rich basis for evaluation of economic performance and its determinants The format of the book stresses topics or questions of interest rather than the theoretical tools for analysis Traditional productivity growth modeling and measurement practices that result in a productivity residual often called the measure of our ignorance are initially overviewed and then the different aspects of technological market and regulatory structure that might underlie this residual are explored The ultimate goal is to decompose or explain the residual by modeling and measuring a multitude of impacts that determine the economic performance of firms sectors and economies The chapters are organized with three broad goals in mind The first is to introduce the overall ideas involved in economic performance measurement and traditional productivity growth analysis Issues associated with different types of short and long run internal and external cost economies market and regulatory impacts and other general cost efficiencies that might impact these measures are then explored Finally some of the theoretical data construction and econometric tools necessary to justify and implement these models are emphasized

A New Measure of Competition in the Financial Industry Jacob Bikker, Michiel van Leuvensteijn, 2014-08-27 The 2008 credit crisis started with the failure of one large bank Lehman Brothers Since then the focus of both politicians and regulators has been on stabilising the economy and preventing future financial instability At this juncture we are at the last stage of future proofing the financial sector by raising capital requirements and tightening financial regulation Now the policy agenda needs to concentrate on transforming the banking sector into an engine for growth Reviving competition in the banking sector after the state interventions of the past years is a key step in this process This book introduces and explains a relatively new concept in competition measurement the performance conduct structure PCS indicator The key idea behind this measure is that a firm s efficiency is more highly rewarded in terms of market share and profit the stronger competitive pressure is The book begins by explaining the financial market s fundamental obstacles to competition presenting a brief survey of the complex relationship between financial stability and competition The theoretical contributions of Hay and Liu and Boone provide the theoretical underpinning for the PCS indicator while its application to banking and insurance illustrates its empirical qualities Finally this book presents a systematic comparison between the results of this approach and all existing methods as applied to 46 countries over the same sample period This book presents a comprehensive overview of the knowns and unknowns of financial sector competition for commercial and central bankers policy makers supervisors and academics alike

Financial Performance Measures and Value Creation: the State of the Art Daniela Venanzi, 2011-12-01 The choice of financial performance measures is one of the most critical challenges facing organizations The accounting based measures of financial performance have been viewed as inadequate as firms began focusing on shareholder value as the primary long term objective of the organization Hence value based metrics were devised that explicitly incorporate the cost of capital into performance calculations Despite the increasing emphasis on these value based measures no definitive evidence exists of which metric works better than others and on the extent to which any of them is superior to traditional accounting measures In this scenario the objective of this book is contributing to the ongoing dialogue on the appropriateness of different financial performance measures by providing a systematic and updated review of the major value based measures by highlighting their respective strengths and weaknesses and by comparing the main international empirical evidence on their effectiveness
