The Of Life The Spiritual And Physical Const:

International Law and Society Laura A. Dickinson, 2017-11-30 Scholars of international human rights law are largely unfamiliar with law and society scholarship while the study of international human rights has remained at the margins of the law and society movement *International Law and Society Empirical Approaches to Human Rights* seeks to bridge this gap by presenting the work of a growing number of academics who are adopting a range of empirical approaches to international human rights Drawn from the fields of anthropology sociology political science and law the studies featured in this volume use a variety of qualitative and quantitative methods to analyze core issues of international law and human rights such as compliance the development of norms and the role of social movements *Theology as Construction of Piety* David T. Ngong, 2013-12-10 This book argues that a primary purpose of theological discourses is to construct piety or spirituality If this is the case theologians need to constantly inquire into the kind of piety or spirituality which their work may construct Drawing from some important moments in the development of Christian theology such as the development of the Christian doctrine of God in the early church the role of material things in the Christianity of medieval Europe some elements of contemporary postliberal theology and the theology of inculturation in Africa the book argues that theological discourses that appear to be orthodox and innocuous may actually construct forms of piety that may diminish human flourishing The book therefore calls for an ethics of theology intended to ensure that the theologies we construct help in developing a piety that is conducive to human flourishing in the modern world especially for Africans who have suffered and continue to suffer unspeakable dehumanization The book proposes that a theology that may contribute to the flourishing of Africans in the modern world is one that constructs an interdisciplinary spirituality that takes both the spiritual and the scientific seriously

The Constant Fire Adam Frank, 2009-01-06 Eloquent urgent and inspiring *The Constant Fire* tackles the acrimonious debate between science and religion taking us beyond its stagnant parameters into the wider domain of human spiritual experience From a Neolithic archaeological site in Ireland to modern theories of star formation Adam Frank traverses a wide terrain broadening our sights and allowing us to imagine an alternative perspective Drawing from his experience as a practicing astrophysicist and from the writings of the great scholars of religion philosophy and mythology Frank locates the connective tissue linking science and religion their commonality as sacred pursuits and finds their shared aspiration in pursuit of the True and the Real Taking us from the burning of Giordano Bruno in 1600 to Einstein and on to today's pressing issues of global warming and resource depletion *The Constant Fire* shows us how to move beyond this stale debate into a more profound experience of the world as sacred a world that embraces science without renouncing human spirituality

Western Medical Review ,1901 *Charles and Emma Darwin: The Option to Believe* Chris Dunford,2022-05-05 Many people look at the world through a scientific lens that seems to forbid religious conviction but then find themselves drawn by curiosity if not longing to the religious worldview Is this tension inevitable or unnecessary The famously successful marriage of Charles and Emma Darwin illustrates the problem Charles and Emma were very close to each other in social background and knowledge of the world yet they found it difficult to agree on the Question of God Were their religious beliefs driven apart more by his science or by their society Were these potentially compatible or inherently irreconcilable Charles and Emma Darwin The Option to Believe searches for answers in the family s history and individual personalities as well as in the cultural social and intellectual history of that family s society The book also looks back on the Darwins predicament from the perspective of modern science and theology and suggests it is society not science that creates the modern tension between science and religion There is an intellectual option to believe in God that seemed unavailable to Victorians like Charles Darwin yet is certainly available to us today
