The Skull Collectors Ann Fabian, 2010-10-15 When Philadelphia naturalist Samuel George Morton died in 1851 no one cut off his head boiled away its flesh and added his grinning skull to a collection of crania It would have been strange but perhaps fitting had Morton's skull wound up in a collector's cabinet for Morton himself had collected hundreds of skulls over the course of a long career Friends diplomats doctors soldiers and fellow naturalists sent him skulls they gathered from battlefields and burial grounds across America and around the world With *The Skull Collectors* eminent historian Ann Fabian resurrects that popular and scientific movement telling the strange and at times gruesome story of Morton his contemporaries and their search for a scientific foundation for racial difference From cranial measurements and museum shelves to heads on stakes bloody battlefields and the rascally pleasure of grave robbing Fabian paints a lively picture of scientific inquiry in service of an agenda of racial superiority and of a society coming to grips with both the deadly implications of manifest destiny and the mass slaughter of the Civil War Even as she vividly recreates the past Fabian also deftly traces the continuing implications of this history from lingering traces of scientific racism to debates over the return of the remains of Native Americans that are held by museums to this day Full of anecdotes oddities and insights *The Skull Collectors* takes readers on a darkly fascinating trip down a little visited but surprisingly important byway of American history

Man's Place in Nature, 1863 Thomas Henry Huxley, 2003 Huxley was one of the first adherents to Darwin's theory of evolution by natural selection and advanced its acceptance by scientists and the public *Man's Place in Nature* was explicitly directed against Richard Owen who had claimed that there were distinct differences between human brains and those of apes Huxley demonstrated that ape and human brains were fundamentally similar in every anatomical detail thus applying evolution to the human race
