

Recent House of Worship Projects

By Thomas S. Friedman

No matter what faith or style of service, all churches share a common goal — that of spreading the message. Some have a greater emphasis on spoken word; others rely more on music; in any variety of styles, whether it be folk, liturgical, gospel or flat-out rock 'n' roll. But all houses of worship need a sound system that provides clarity, intelligibility and musicality.

With that in mind, we present some recent installation projects, ranging from whole system to incremental upgrades. Each took a different route in their approach, proving there are numerous solutions to any audio problem — large or small — for any sanctuary.

Light Presbyterian Church, Mississauga, ON Canada

Audio Project helped FM install a 10,000-watt system in this North American house of worship.

With a seating capacity of 2,000, Light Presbyterian Church in Mississauga is a Gospel-centered church that serves a multi-ethnic and multi-generational community.

The audio environment in the wide, fan-shaped chapel is far from perfect. The highly reflective stage is not acoustically friendly, and neither is a second-floor glass balcony railing. This combination meant that the congregation was finding it hard to hear and fully understand services.

To solve these challenges, Light Presbyterian Church hired installer The Two from Barbra BonSocial Music

Nazareth Lutheran Church, Cedar Falls, IA

Vantage Pro provided a cost-effective immersive solution with L-Acoustics L-ISA II.

Established in 1871, Nazareth Lutheran Church has undergone various changes over its past 150 years. Like many other houses of worship, one of those updates was a choice to host both traditional choir/organ and contemporary worship services on Sundays to better cater to parishioners' preferences in worship style.

Just this year, Nazareth Lutheran sought to stay current in

another way—by updating its PA system to one that would not only deliver exceptional sound for both musical genres but also position the church for its next generation of worshippers. That decision

types," says Marc Breda, project lead for Vantage Pro. "The pastor wanted that, but he also wanted the system to be ready to take the ministry into the future." Cedar Falls is home to the University of North Iowa, where more than 10,000 students are enrolled. "They wanted a system that would also engage a younger generation who have become accustomed to sophisticated sound. L-ISA accomplishes that," Breda says.

Nathaniel Parrish, the church's music director, credited the new system as a "huge improvement in clarity and fullness. We recently had an event with 25 singers and musicians on stage, and it sounded great. We never could have pulled that off with our old sound system."
