The One Straw Revolution:

The One-Straw Revolution Masanobu Fukuoka, 2010-09-08 Call it Zen and the Art of Farming or a Little Green Book Masanobu Fukuoka's manifesto about farming eating and the limits of human knowledge presents a radical challenge to the global systems we rely on for our food At the same time it is a spiritual memoir of a man whose innovative system of cultivating the earth reflects a deep faith in the wholeness and balance of the natural world As Wendell Berry writes in his preface the book is valuable to us because it is at once practical and philosophical It is an inspiring necessary book about agriculture because it is not just about agriculture Trained as a scientist Fukuoka rejected both modern agribusiness and centuries of agricultural practice deciding instead that the best forms of cultivation mirror nature's own laws Over the next three decades he perfected his so called do nothing technique commonsense sustainable practices that all but eliminate the use of pesticides fertilizer tillage and perhaps most significantly wasteful effort Whether you're a guerrilla gardener or a kitchen gardener dedicated to slow food or simply looking to live a healthier life you will find something here you may even be moved to start a revolution of your own

One-Straw Revolutionary Larry Korn, 2015-08-21 One Straw Revolutionary represents the first commentary on the work of the late Japanese farmer and philosopher Masanobu Fukuoka 1913-2008 widely considered to be natural farming's most influential practitioner Mr Fukuoka is perhaps most known for his bestselling book *The One Straw Revolution* 1978 a manifesto on the importance of no till agriculture which was at the time of publication a radical challenge to the global systems that supply the world's food and still inspires readers today Larry Korn who apprenticed with Mr Fukuoka in Japan at the time translated the manuscript and brought it to the United States knowing it would change the conversation about food forever *The One Straw Revolution* edited by Korn and Wendell Berry was an immediate international success and established Mr Fukuoka as a leading voice in the fight against conventional industrial agriculture In this new book through his own personal narrative Larry Korn distills his experience of more than thirty five years of study with Mr Fukuoka living and working on his farm on Shikoku Island and traveling with Mr Fukuoka to the United States on two six week visits One Straw Revolutionary is the first book to look deeply at natural farming and intimately discuss the philosophy and work of Mr Fukuoka In addition to giving his personal thoughts about natural farming Korn broadens the discussion by pointing out natural farming's kinship with the ways of indigenous cultures and traditional Japanese farming At the same time he clearly distinguishes natural farming from other forms of agriculture including scientific and organic agriculture and permaculture Korn also clarifies commonly held misconceptions about natural farming in ways Western readers can readily understand And he explains how natural farming can be used practically in areas other than agriculture including personal growth and development The book follows the author on his travels from one back to the land commune to another in the countryside of 1970s Japan a journey that eventually led him to Mr Fukuoka's natural farm Korn's description of his time there as well as traveling with Mr Fukuoka during his visits to the United States offers a rare

The Art of Being a Creature Ragan Sutterfield,2024-05-10 From AI to the Anthropocene technological power has pushed human life to the limits It s at those limits that we re faced again with the questions of who we are and how we should live What if a study of the soil the humus from which humanity came could shed light on our condition What if attending to the soil could teach us something about how we should live In The Art of Being a Creature Ragan Sutterfield explores these questions in conversation with the ground Turning a compost pile while meditating on kenosis or reflecting on St Bernard while examining fungal hyphae Sutterfield seeks to recover the practice of humility by looking at the humus The path toward being fully human he finds is not to be discovered through a spiritual seeking in the heavens but through a pilgrimage to the soil beneath our feet Anyone who reads The Art of Being a Creature will never see the soil or their life upon it the same again

Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security Erokhin, Vasili, Gao, Tianming,2019-10-25 Free trade promotes economic growth through international competition and the efficient allocation of resources while also helping to stabilize food supplies between countries that have an overabundance of product and countries that have a shortage However sudden price surges can threaten the social cohesion of developing countries and may lead to malnutrition and stunted growth Balancing trade liberalization and protectionism is imperative for

the provision of food security for all The Handbook of Research on Globalized Agricultural Trade and New Challenges for Food Security is an essential publication that seeks to improve food security food independence and food sovereignty in the conditions of globalized agricultural trade and addresses the contemporary issues of agricultural trade including major commodities and food products traded between major countries directions of trade and trends The book also examines the effects of tariff escalations administrative restrictions other forms of trade protectionism on food security and the emerging trade tensions between major actors such as the US China the EU and Russia Featuring research on topics including plant fertility dietary diversity and protectionism this book is ideally designed for government officials policymakers agribusiness managers stakeholders international tradesmen researchers industry professionals academicians and students *Nature's Unruly Mob* Paul Gilk, 2009-06-03 Growing up in the mostly wooded rural countryside of northern Wisconsin in the decades immediately after the Second World War meant immersion in cultural transformation An economy of subsistence and self provisioning was rapidly becoming industrialized and commercial The culture of the local and small scale was being overpowered by the metropolitan and large scale This experience provided the practical groundedness for exploring the decline and even the demise of small scale farming not just in northern Wisconsin but as an example and illustration of how industrialization and globalization undermine local rural culture everywhere Linked with an ecological critique that asserts the unsustainability of globalized industrialism the exploration into the meaning of rural culture took on larger significance especially when seen in relation to the collapse of all prior civilizations In addition the investigation into the origins of civilization revealed the predatory relationship civilization developed in regard to agriculture and rural life The rampant globalization of civilization results in the destitution and impoverishment of agrarian culture The question then becomes whether civilization has finally achieved the technical mastery by which to protect and extend itself permanently or whether its complexity only assures a more catastrophic collapse or whether civilization may learn to be flexible enough to merge with an essentially noncivilized folk culture to create a new cultural sensibility that enhances the best of both worlds This is the question the entire world is now facing Weapons of mass destruction climate change and peak oil all combine the force a resolution to this dilemma **The New Village Green** Stephen Morris, the Editors of Green Living, 2007-09-01 The village green is the focal point of any community a gathering place where the best ideas take root and the brightest voices are heard The New Village Green gathers some of the best ideas and brightest voices of the green community some famous and familiar others fresh and unknown Each tells an absorbing story and collectively they comprise a powerful chorus that profiles the current state of the environment This remarkable book gathers wisdom and insight from a compelling and thought provoking virtual community Each contributor brings a unique perspective that mingles reverence for the environment with provocative thoughts for the future Topics range from spirituality to solar panels and just like a real village green are juxtaposed with opinions from the new village people including Writers Bill McKibben and Michael Pollan Scientists James Lovelock and

Donella Meadows Spiritual leaders Gandhi and Buddha Practical homespun topics are given equal time Good reasons to embrace alternative currencies Tips for growing great garlic Meant to be devoured in one sitting or sipped a little at a time this book springboards the green movement into the future by acknowledging its roots in the past Rachel Carson Paul Ehrlich and Helen and Scott Nearing are as relevant today as the Slow Food Movement and Peak Oil This book will touch the heart of anyone who lives with conscience and hope

Chinese Environmental Aesthetics Gerald Cipriani, 2015-05-15 China is currently afflicted by enormous environmental problems This book drawing on ancient and modern Chinese environmental thinking considers what it is that makes an environment a desirable place for living The book emphasises ideas of beauty and discusses how these ideas can be applied in natural agricultural and urban environments in order to produce desirable environments The book argues that environment is both a product of nature and of human beings and as such is potentially alterable by culture The book explores the three aspects of environmental beauty whereby such alteration might be beneficially made integrated and holistic ecological and man made and authentic and everyday This book addresses environmental issues by distinctively suggesting that an aesthetic approach inspired from ancient Chinese tradition could help us overcome the many problems that human beings have created at local and global levels Although its main focus is the traditional and current contexts of the People's Republic of China the book transcends national borders A typical example is the ancient Chinese thought system and cultural practice of Feng Shui that sought to negotiate how the natural environment and human constructions can cohabit without destructing each other The author evokes that sought after harmony through the powerful image of gardens of life whose environmental beauty can be found in traditional Chinese gardens and palaces as well as historically and culturally preserved cities
