

A woman with dark hair pulled up, wearing a white tank top, is looking down and to the right. She is positioned in front of a large, textured green surface that resembles grass or a wall. The lighting is dramatic, with a strong blue shadow cast behind her on the left side of the frame.

**Songsaengnim** Ross Brown, 2012-02 It is March of 1997 and Roland Axam lost out of his element and in a new world As his plane begins its final approach to Kimp o International Airport in Seoul South Korea Roland realizes his life is about to change forever again Roland has already survived a devastating life altering tragedy back home in Ottawa Canada he knows that what he needs most now is a clean slate As he arrives in Ch nju South Korea where he plans to teach English and leave his past behind Roland abandons all that is familiar for the unknown He immerses himself in a vastly different culture where communication is difficult and his need to belong brings challenges But despite the distractions of a bustling city thousands of miles from everything he knows Roland is still haunted by anger guilt and demons that he attempts to drown in alcohol In this compelling tale one man travels across an ocean to begin an unforgettable journey of self discovery that eventually leads him to realize love forgiveness healing and another new beginning *Interface Fantasy* Andre Nusselder, 2009-09-11 Behind our computer screens we are all cyborgs through fantasy we can understand our involvement in virtual worlds Cyberspace is first and foremost a mental space Therefore we need to take a psychological approach to understand our experiences in it In *Interface Fantasy* Andr Nusselder uses the core psychoanalytic notion of fantasy to examine our relationship to computers and digital technology Lacanian psychoanalysis considers fantasy to be an indispensable screen for our interaction with the outside world Nusselder argues that at the mental level computer screens and other human computer interfaces incorporate this function of fantasy they mediate the real and the virtual *Interface Fantasy* illuminates our attachment to new media why we love our devices why we are fascinated by the images on their screens and how it is possible that virtual images can provide physical pleasure Nusselder puts such phenomena as avatars role playing cybersex computer psychotherapy and Internet addiction in the context of established psychoanalytic theory The virtual identities we assume in virtual worlds

exemplified best by avatars consisting of both realistic and symbolic self representations illustrate the three orders that Lacan uses to analyze human reality the imaginary the symbolic and the real Nusselder analyzes our most intimate involvement with information technology the almost invisible affective aspects of technology that have the greatest impact on our lives Interface Fantasy lays the foundation for a new way of thinking that acknowledges the pivotal role of the screen in the current world of information And it gives an intelligible overview of basic Lacanian principles including fantasy language the virtual the real embodiment and enjoyment that shows their enormous relevance for understanding the current state of media technology **Parliamentary Debates (Hansard)**.
