Sturmgeschütz Assault Gun:

Tank Craft 44 Stug III Assault Gun Dennis Oliver, 2025-05-30 Explores the evolution use and technical details of the German Sturmgeschütz assault guns during World War II focusing on the Eastern Front **M10 Tank Destroyer vs StuG III Assault Gun** Steven J. Zaloga, 2013-08-20 The Allies M10 Tank Destroyer and the Germans Sturmgeschütz StuG III were the unsung workhorses of the northwest European battlefields of 1944-45. While their mission was not principally fighting one another, their widespread use ensured their frequent encounters from the Normandy bocage to the rubble strewn streets of Aachen. The StuG III was the quintessential assault gun, a low slung heavily armoured turretless vehicle intended to provide direct fire support for infantry formations whilst the M10 3in Gun Motor Carriage was originally developed as a tank destroyer. However, by 1944 the 3in gun proved ineffectual against the most thickly armoured German tanks and was consequently relegated to infantry support too. Widely deployed in roles their designers had not envisaged, these two armoured fighting vehicles clashed repeatedly during the 11 month campaign which saw the Allies advance from Normandy to the heart of the Reich. Fully illustrated with specially commissioned artwork, this is the story of their confrontation at the height of World War II **Illustrated History of the Sturmgeschütz-Abteilung 202** Norbert Számvéber, 2016-05-24 The Sturmgeschütz Abteilung 202 was one of the most successful German assault gun units in the Second World War. It had been deployed exclusively on the Eastern Front against the Red Army between 1941 and 1945. The StuGs of this unit were very effective AFVs on the battlefield in the role of heavy weapons for infantry fire support and also as mobile antitank firepower. Dr Norbert Számvéber, author of *Waffen SS Armour in Normandy and Days of Battle*, presents a detailed combat history of this unit primarily based on archival sources. The book includes a significant number of rare photographs and several maps.

T-34 vs StuG III Steven J. Zaloga, 2019-08-22 In the summer of 1944 the Red Army staged a massive armoured assault up the Karelian Isthmus with the intent of eliminating any remaining German and Finnish forces facing the Leningrad region. Most of the Soviet units sent into Finland were new to the region, moving mainly from the fighting in the Leningrad area. As a result, some had the latest types of Soviet equipment, including the new T-34-85 tank, fielded alongside the older T-34-76. Germany refused to sell the Finns new tanks without a reinforced military alliance, but in 1943 began selling them a few dozen StuG III assault guns. This made the StuG III battalion the most modern and powerful element of the Finnish armoured division, and it saw very extensive combat in the June-July summer battles. Featuring specially commissioned artwork and an array of archive photographs, this is the absorbing story of the parts played by Soviet and Finnish armour in the epic battles in Finland during June and July 1944 **ABT724 - STURMGESCHÜTZ EN**, This work is a study on the development and organization of Wehrmacht assault cannon units since its creation in 1940 until the end of World War II. The uniforms and characteristics of the main models of cannon and assault shells are also studied, as well as some of the support vehicles that were part of the material that was delivered to these units. The book contains illustrations and photographs, many of which

Bagration 1944 Steven J. Zaloga, 2023-05-25 A new study of tank warfare used in the Soviet offensive of Operation Bagration which destroyed Army Group Center Operation Bagration the 1944 summer campaign on the Russian Front has been called Hitler s Greatest Defeat The operation involved substantial tank and armored vehicles on both sides but the German forces were severely hampered by the transfer of dozens of Panzer divisions to France to repel an expected Allied invasion Forced to make hard decisions German tank forces in the central Belarus sector were weak compared to the heavy concentration of Panzers in northern Ukraine The Red Army exploited this vulnerability crushing Army Group Center and pushing beyond the Soviet frontier into Poland and East Prussia With this crucial victory secured the Red Army conducted successive offensives beyond the Carpathian Mountains arriving at the Vistula river in Poland and forcing Romania to switch sides The Red Army had embarked on a major tank modernization after the Kursk battles of 1943 and as a result Operation Bagration saw the first widespread use of T 34 85 and IS 2 tanks as well as self propelled guns Germany s Panther tank finally reached technical maturity in the summer of 1944 but small numbers weakened its battlefield impact while other innovations such as the Tiger II heavy tank failed to leave their mark Using new photos and a fascinating selection of color illustrations explaining the camouflage and markings of these tanks this book describes how the tanks and AFVs on both sides contributed to the eventual defeat of Army Group Center *Panzer Divisions 1944-45* Pier Paolo Battistelli, 2013-01-20 Completing Osprey s mini series on the German Panzer division a detailed look at their organizational structure from the collapse of the Eastern front until the fall of Berlin This volume provides a comprehensive examination on the late war changes to the German Army Panzer forces and the formation of new units from the collapse on the Eastern Front through operations on the Western Front in Normandy and the Ardennes to the final battle for Berlin in 1945 The major

Allied forces such as those from Poland Czechoslovakia and Romania on the outcome of victory in the war **Hetzer - Jagdpanzer 38 Tank Destroyer** Dennis Oliver,2021-08-04 By 1944 the German army was on the defensive on all fronts and Allied bombing was putting increasing pressure on the nation's industrial output Since the earliest days of the war the Germans had experimented with mounting anti tank weapons on obsolete chassis and one of the most successful of these would prove to be the Jagdpanzer 38 more often referred to today as the Hetzer Small and unimposing the Hetzer's appearance belied its effectiveness Armed with the powerful 7.5cm L 48 gun the same weapon fitted to the Jagdpanzer IV the Hetzer featured armoured sloped armour plates of up to 60mm thickness and was capable of a top speed of 42 kilometres per hour Almost 3 000 examples were assembled and its low cost and ease of production meant that it was Germany's most important tank killer of the late war period In his latest book in the TankCraft series Dennis Oliver uses archive photos and extensively researched color illustrations to examine the Hetzer tank destroyers and the units of the German Army and Waffen SS that operated them during the last months of the Second World war A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales Technical details as well as modifications introduced during production and in the field are also examined providing everything the modeller needs to recreate an accurate representation of these historic tanks The Liberators of Pilsen Bryan J. Dickerson,2018-01-14 Formed in July 1943 at Camp Chaffee Arkansas the 16th Armored Division was the last U S armored division to be activated in World War II the last deployed to the European Theater and the last to see combat As the war in Europe was coming to an end General George S Patton chose the division to spearhead a daring advance into Czechoslovakia In its first and only combat operation the 16th liberated the city of Pilsen forever endearing itself to the Czech people Poised to continue to the capital city of Prague the division was halted not by German resistance but by political rivalries between the Western powers and the Soviet Union Official U S Army records and veteran accounts tell the story of the unit's brief two year existence and its successful mission
