Sturmgeschütze Vor Assault Guns To The Front:

German Assault Guns on the Eastern Front Hans Wijers, 2018-09-01 Assault guns Sturmgeschütz in German were armored fighting vehicles similar to tanks with the chassis and tracks of a panzer but without the rotating turret which allowed the mounting of a larger gun. They were usually used to support infantry assaults but they also proved effective as tank destroyers especially late in the war when German tank inventory diminished. Among the most famous variants are the Sturmtiger and Brummbär. Grouh Hans Wijers has assembled hundreds of photos most of them never seen anywhere before of these vehicles at war on the Eastern Front of World War II. Illustrated History of the Sturmgeschütz-Abteilung 202

Norbert Számvéber, 2016-05-24 The Sturmgeschütz Abteilung 202 was one of the most successful German assault gun units in the Second World War. It had been deployed exclusively on the Eastern Front against the Red Army between 1941 and 1945. The StuGs of this unit were very effective AFVs on the battlefield in the role of heavy weapons for infantry fire support and also as mobile antitank firepower. Dr Norbert Számvéber author of *Waffen SS Armour in Normandy and Days of Battle* presents a detailed combat history of this unit primarily based on archival sources. The book includes a significant number of rare photographs and several maps. Tank Craft 44 Stug III Assault Gun Dennis Oliver, 2025-05-30 Explores the evolution, use and technical details of the German Sturmgeschütz assault guns during World War II focusing on the Eastern Front.

Stug IV Assault Gun German Army and Waffen-SS Units Dennis Oliver, 2026-01-30 From their introduction in 1940 the Wehrmacht's Sturmgeschütz assault guns played an essential role in the campaigns of the Blitzkrieg era: the titanic struggles in Russia and the final defensive battles of the war. Evolving from a mobile bunker buster armed with a short-barrelled howitzer, the Sturmgeschütz was up-armoured and up-gunned and by 1943 it was increasingly employed as a tank killer. In 1944, largely as an emergency quick fix, the Sturmgeschütz IV entered service and over 1,000 examples had been built by the end of the war. As the Wehrmacht's resources continued to decline, the assault guns were thrown into every operation and increasingly substituted for gun tanks in official unit establishments. In the third volume in the TankCraft series to examine the Sturmgeschütz, Dennis Oliver employs official documentation and unit histories to investigate the formations that operated the Sturmgeschütz IV and uses archive photos and extensively researched colour illustrations to examine the markings, camouflage and technical aspects of the vehicles that served on the Eastern Front during the last months of the campaign. A key section of his book displays available model kits and aftermarket products complemented by a gallery of beautifully constructed and painted models in various scales. Technical details as well as modifications introduced during production and in the field are also examined, providing everything the modeller needs to recreate an accurate representation of these historic vehicles. Hitler's Tank Killer Hans Seidler, 2010-08-19 Sturmgeschütz III was originally designed as an assault weapon but as war progressed it was increasingly used in a defensive role and evolved into an assault gun and tank destroyer. By 1943 its main role was providing anti-tank support to the units in its area of operation. This consequently led to many

StuGs being destroyed in battle Nonetheless they were very successful as tank killers and destroyed among others many bunkers pillboxes and other defenses While not considered to be a true tank because it lacked a turret the gun was mounted directly in the hull with a low profile to reduce vehicle heights and had a limited lateral traverse of a few degrees in either direction Thus the entire vehicle had to be turned in order to acquire targets Omitting the turret made production much simpler and less costly enabling greater numbers to be built Most assault guns were mounted on the chassis of a Panzer III or Panzer IV with the resultant model being called either a StuG III or StuG IV respectively The StuG was one of the most effective tracked vehicles of World War II and over 10 000 of them were eventually produced *Sturmgeschütze Vor!* Franz Kurowski,1999

ABT724 - STURMGESCHÜTZ EN , This work is a study on the development and organization of Wehrmacht assault cannon units since its creation in 1940 until the end of World War II The uniforms and characteristics of the main models of cannon and assault shells are also studied as well as some of the support vehicles that were part of the material that was delivered to these units The book contains illustrations and photographs many of which they had not published so far

Tanks in Operation Bagration 1944 Steven J. Zaloga, 2023-05-25 A new study of tank warfare used in the Soviet offensive of Operation Bagration which destroyed Army Group Center Operation Bagration the 1944 summer campaign on the Russian Front has been called Hitler's Greatest Defeat The operation involved substantial tank and armored vehicles on both sides but the German forces were severely hampered by the transfer of dozens of Panzer divisions to France to repel an expected Allied invasion Forced to make hard decisions German tank forces in the central Belarus sector were weak compared to the heavy concentration of Panzers in northern Ukraine The Red Army exploited this vulnerability crushing Army Group Center and pushing beyond the Soviet frontier into Poland and East Prussia With this crucial victory secured the Red Army

conducted successive offensives beyond the Carpathian Mountains arriving at the Vistula river in Poland and forcing Romania to switch sides The Red Army had embarked on a major tank modernization after the Kursk battles of 1943 and as a result Operation Bagration saw the first widespread use of T 34 85 and IS 2 tanks as well as self propelled guns Germany's Panther tank finally reached technical maturity in the summer of 1944 but small numbers weakened its battlefield impact while other innovations such as the Tiger II heavy tank failed to leave their mark Using new photos and a fascinating selection of color illustrations explaining the camouflage and markings of these tanks this book describes how the tanks and AFVs on both sides contributed to the eventual defeat of Army Group Center
