**English in India** Ravi Sheorey, 2006-03-09 This book presents empirical studies on the various factors that influence English language learning and teaching in India. In particular, the author examines whether and to what extent the variables which have been shown to influence second language learning in monolingual countries also apply to the Indian situation, which is characterized by multilingualism and multiculturalism. Among the various aspects discussed in this book are Indian students and their teachers' theories about learning English, their preferences or styles for language learning, the learning and reading strategies they use to enhance their competence in English, the degree of language learning anxiety they experience and their attitudes toward and motivation for learning English. Ravi Sheorey also explores Indian teachers' judgments of the errors they come across in the writings of their students. The results are compared to studies with subjects from other countries and the implications for the learning and teaching of English are discussed in each chapter.      **Engineering Technology,**

**Japanese and German Management Styles from the German Perspective** Markus Richwien, 2002-08-07 Inhaltsangabe Abstract As the idea of Japan as a leader in management styles and the mythos of collectivism as a key to high quality performance and productivity is still in the mind of German managers, this work tries to compare actual leadership styles of Japanese and German managers on the level of cultural dimensions. In the study, the sample consisted of 119 persons in middle management positions: 82 male and 37 female; 60 persons with work experience in Japan and 59 without experience. Participants were asked to complete a questionnaire regarding 52 leadership characteristics, e.g., the ability to assert oneself, to cooperate or to delegate, within five cultural dimensions. Participants then rated the importance of this characteristic for the specific category. Findings of the study showed significant differences in experienced and estimated management styles between the countries, as well as significances regarding management traits of the German culture after working in Japan.
