Primary Science Education in East Asia Yew-Jin Lee, Jason Tan, 2018-09-26 This edited volume is a state of the art comparison of primary science education across six East Asian regions namely the People's Republic of China Republic of Korea Republic of China Hong Kong SAR Japan and Singapore While news of educational policies classroom teaching assessment and other educational innovations here often surface in the international media this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia Above all it is a readable yet comprehensive survey readers would have an accurate sense of what has been accomplished what has not worked so well and what remains to be done Invited experts in comparative education research and or science education also provide commentary by discussing common themes across the six regions These types of critical synoptic reviews add much value by enabling readers to understand broad commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts issues and policies Education in East Asia holds many lessons both positive and negative to offer to the rest of the world to which this volume is a timely contribution to the literature

International Handbook on Geographical Education Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable

economic development and of environmental quality all feature as topics which influence and are influenced by geographical education

Quality in Education Dr. T. Sivasakthi Rajammal, 2021-03-19 Education is the basic foundation of a country where teaching and learning are seen as a key for change of individual for national advancement A country is said to be esteemed when a noticeable number of the natives have quality training and education The use of ICT in enriching learning environments within schools and colleges has been demonstrative in identifying the conditions in which ICT can be used in an effective manner to enhance the quality of teaching learning processes and instructional strategies It renders a significant contribution in creating social payoffs which would be conducive to sustainable growth and equitable development The use of ICTs in pedagogy has set out certain benchmarks for the integration of ICT into the learning process as the way to bring about improvements in the quality of education in specific social frameworks The paper discusses the role and effect of ICTs in improving the quality of education

Second Language Identity in Narratives of Study Abroad P. Benson, G. Barkhuizen, P. Bodycott, J. Brown, 2013-08-15 Study abroad is now both an international industry and an experience that can have a deep impact on students attitudes and approaches to second language learning Narratives of Second Language Identity in Study Abroad brings together three important research areas by exploring the impact of study abroad on second language identities through narrative research It outlines a new model of second language identity that incorporates a range of language and personal competencies The three main dimensions of this model are explored in chapters that begin with students study abroad narratives followed by the authors in depth analysis Further chapters use narratives to assess the impact of programme type and individual difference Arguing that second language identity development is one of the more important outcomes of study abroad the book concludes with recommendations on how study abroad programmes can best achieve this outcome
