Subject Theme And Agent In Modern Standard Arabic:

Subject, Theme and Agent in Modern Standard Arabic , *Subject, Theme and Agent in Modern Standard Arabic* Hussein Abdul-Raof, 2013-10-28 Investigates the universal categories subject theme and agent with special reference to their functional status in Modern Standard Arabic MSA and how these three distinct functions may or may not coincide in Arabic sentences These functions are inexplicitly characterised by classical and modern Arab linguists and Arabists alike It has been found that the pre viz sentence initial or post verbal noun phrase NP in Arabic can be assigned the syntactic function subject but may not necessarily assume the semantic function agent that the pre verbal NP which may not necessarily be the subject has the pragmatic function theme and that these distinct functions sometimes cluster around a single NP in certain sentences depending on genre It has also been found that in MSA the order of sentence constituents is relatively free subject to a verb initial preference especially when needed to prevent ambiguity The present study reveals the fact that although coding features such as word order case marking and cross referencing viz agreement may provide a clear indication of which NPs are subjects in MSA they do not provide a clear cut indication of semantic relations such as agent the subject position in MSA is not necessarily the canonical agent position

Sentence Types and Word-Order Patterns in Written Arabic Yishai Peled, 2008-11-30 Sentence types and word order patterns in Arabic have been a matter of debate and controversy for a long period of time They were hotly discussed by the medieval Arab grammarians and continue to be a major topic of discussion among modern scholars This book describes the development of the medieval grammarians theory of sentence types a development from the theory of amal which lies at the heart of medieval Arabic grammatical tradition Each major topic is discussed with a view to explore the basic principles underlying the medieval grammarians arguments Special attention is given to conceptual problems arising from conflicts with the theory of amal This is followed by an assessment of the contributions made by modern scholars to the analysis and description of the constructions involved Modern Arabists and linguists are shown to have concentrated on word order patterns rather than on sentence types placing special emphasis on the functional aspects of word order variations in Arabic

Arabic Rhetoric Hussein Abdul-Raof, 2006-09-27 Arabic Rhetoric explores the history disciplines order and pragmatic functions of Arabic speech acts It offers a new understanding of Arabic rhetoric and employs examples from modern standard Arabic as well as providing a glossary of over 448 rhetorical expressions listed in English with their translations which make the book more accessible to the modern day reader Hussein s study of Arabic rhetoric bridges the gap between learning and research whilst also meeting the academic needs of our present time This up to date text provides a valuable source for undergraduate students learning Arabic as a foreign language and is also an essential text for researchers in Arabic Islamic studies and students of linguistics and academics

Thematic Structure and Para-Syntax: Arabic as a Case Study James Dickins, 2020-03-05 Thematic Structure and Para Syntax Arabic as a Case Study presents a structural analysis of Arabic providing an alternative to the traditional notions of

theme and rheme Taking Arabic as a case study this book claims that approaches to thematic structure propounded in universalist linguistic theories of which Hallidayan systemic functional linguistics is taken as an illustrative example are profoundly wrong It argues that in order to produce an analysis of thematic structure and similar phenomena which is not undermined by its own theoretical presuppositions it is necessary to remove such notions from the domain of linguistic and semiotic theory The book initially focuses on Sudanese Arabic because this allows for a beautifully clear exposition of general principles before applying these principles to Modern Standard Arabic and some other Arabic varieties This book will be of interest to scholars in Arabic linguistics linguistic theory and information structure **Advances in Natural Language**

Processing Tapio Salakoski, Filip Ginter, Sampo Pyysalo, Tapio Pahikkala, 2006-08-10 This book constitutes the refereed proceedings of the 5th International Conference on Natural Language Processing FinTAL 2006 held in Turku Finland in August 2006 The book presents 72 revised full papers together with 1 invited talk and the extended abstracts of 2 invited keynote addresses The papers address all current issues in computational linguistics and monolingual and multilingual intelligent language processing theory methods and applications Arabic Dislocation Ali A. Alzayid, 2022-03-15 Since the early years of generative grammar Chomsky 1977 inter alia the phenomenology of dislocation has proved to be a fertile area of research This however has not been the case for Modern Standard Arabic MSA and hence this thorough monograph intends to fill this lacuna Three aspects of this linguistic phenomenon stand out the taxonomy of possible dislocated configurations syntax and interpretation Though the structure in itself has been extensively studied in various languages including varieties of spoken Arabic this monograph shows that MSA presents properties that set it apart from known varieties and cannot be captured by an extension or modification of existing analyses Moreover existing analyses are not fully satisfactory as there are open analytical questions regarding the interpretation and syntactic analysis of dislocation structures crosslinguistically Particularly the optimal path to follow concerning dislocation structures in MSA is to argue for the claim that contrast as an information structural notion underlies the interpretation of dislocated elements and these elements are best syntactically analyzed as being involved in a bisentential configuration contra monoclausal approaches to dislocation This monograph should be relevant to anyone with an interest in the Arabic language and also to syntacticians and typologists with an interest in sentence structure **Cultural Encounters in Translation from Arabic** Said

Faiq, 2004-09-08 Translation is intercultural communication in its purest form Its power in forming and or deforming cultural identities has only recently been acknowledged given the attention it deserves The chapters in this unique volume assess translation from Arabic into other languages from different perspectives the politics economics ethics and poetics of translating from Arabic a language often neglected in western mainstream translation studies **Thinking Arabic**
