Subject Headings:

Library of Congress Subject Headings Lois Mai Chan,1990 This resource attempts to describe the principles that underlie the structure of the Library of Congress subject headings system and the policies that govern the assignment of subject headings to LC MARC records

Library of Congress Subject Headings Library of Congress,1991 **Essential Library of Congress Subject Headings** Vanda Broughton,2011-11-20 Library of Congress Subject Headings LCSH are increasingly seen as the English language controlled vocabulary despite their lack of a theoretical foundation and their evident US bias In mapping exercises between national subject heading lists and in exercises in digital resource organization and management LCSH are often chosen because of the lack of any other widely accepted English language standard for subject cataloguing It is therefore important that the basic nature of LCSH their advantages and their limitations are well understood both by LIS practitioners and those in the wider information community Information professionals who attended library school before 1995 and many more recent library school graduates are unlikely to have had a formal introduction to Library of Congress Subject Headings LCSH Paraprofessionals who undertake cataloguing are similarly unlikely to have enjoyed an induction to the broad principles of LCSH This is the first compact guide to LCSH written from a UK viewpoint Key topics include background and history of LCSH subject heading lists structure and display in LCSH form of entry application of LCSH document analysis main headings topical geographical and free floating sub divisions building compound headings name headings headings for literature art music history and law LCSH in the online environment Readership There is a strong emphasis throughout on worked examples and practical exercises in the application of the scheme and a full glossary of terms is supplied No prior knowledge or experience of subject cataloguing is assumed This is an indispensable guide to LCSH for practitioners and students alike

Library of Congress Subject Headings William E Studwell,Ruth C Carter,2013-02-01 The first comprehensive theoretical treatise on Library of Congress subject headings this important book provides an analysis of the Library of Congress subject heading system and its application Library of Congress Subject Headings aims to help improve the clarity of the system increase consistency and arrangement increase the number of effective access points facilitate the interaction of the system with the computer and generally to make the Library of Congress subject heading system and its application of even greater value to the cataloger and the user Practicing catalogers library school personnel advanced students and any professional who is very knowledgeable about and seriously interested in Library of Congress subject headings will want to read this highly acclaimed volume Author William Studwell includes theoretical conceptual and philosophical considerations based on 25 years of everyday practical cataloging and indexing work and the knowledge gained from theoretical research for the more than two dozen articles on subject cataloging that he has written in the last decade He presents thought provoking often controversial material in three parts The first section The System deals with the basic philosophical foundations of LC subject headings Thirty two principles guidelines and

suggestions are offered along with detailed explanations examples and their relationships to other principles The second section Application focuses on the matters of subject cataloging practice or interpretation and application of LC subject headings The third section The Future looks ahead to future issues relating to subject cataloging such as the development of a theoretical subject heading code the interface of LC subject headings with the computer and some speculation as to the role and nature of LC subject headings in the years to come
