Bennett, 1995 This volume brings together 11 papers which relate to a seminar on language typology held at SOAS in 1988-89 The papers contain a study of the work of the Leningrad Group for the Typological Study of Languages and make some of the Group's research accessible in English translation *Language Typology and Language Universals 2. Teilband* Martin Haspelmath, Ekkehard König, Wulf Oesterreicher, Wolfgang Raible, 2008-07-14 No detailed description available for Language Typology and Language Universals 2 Teilband **Essays on Typology of Iranian Languages** Alireza Korangy, Behrooz Mahmoodi-Bakhtiari, 2019-10-21 The Iranian languages are one of the world's major language families With an estimated 150 to 200 million native speakers these languages constitute the western group of the larger Indo Iranian family which represents a major eastern branch of the Indo European languages Geographically the Iranian Languages are spoken from Central Turkey Syria and Iraq in the West to Pakistan and western edge of Xinjiang Uygur Autonomous Region of China in the east Iranian languages have long been among the major interests of the philologists and general linguists and European scholars have made tremendous contributions to the study of this language family In light of such efforts now we know that the Iranian languages can be historically divided into three phases that are old middle and new Iranian languages and the new Iranian languages may be generally grouped as Eastern and Western In recent years the orientation towards typology has led to the appearance of somewhat more ponderance on the subject but the work has not included description of some of the very important languages of the Caspian and or of the religious minorities such as those of the Zoroastrians or the Jewish community of the four fold Central Plateau dial **Tense-aspect, Transitivity and Causativity** Werner Abraham, L. I. Kulikov, 1999-01-01 This collection presents typological work on tense aspect and epistemic modality in a variety of languages and against the background of different schools of thinking among which the St Petersburg Typological School developed and so masterfully implemented by the Petersburg linguist Vladimir

Arguments and Case Eric J. Reuland, 2000-09-15 The ideas presented by the contributions in this volume originated in a workshop on Burzio's generalization Burzio's Generalization BG states that a verb which does not assign an external theta role to its subject does not assign structural accusative Case to an object and conversely It connects cross linguistic similarities between e.g. passives raising verbs and unaccusatives However it does so by linking very different properties of a predicate This raises fundamental questions about its theoretical status The contributions in this volume explore BG's theoretical basis A consensus emerges that BG is in fact an epiphenomenon due to the interaction of different principles of grammar Moreover the contributions show a striking convergence as to how BG is ultimately derived The results obtained make a significant contribution to the further development of theories of Case and thematic relations

Language Policy and Language Conflict in Afghanistan and Its Neighbors Harold Schiffman, 2011-12-09 The book was co edited by Brian Spooner Professor of Anthropology at the University of Pennsylvania Language policy in Central Asia Afghanistan and the immediately surrounding neighboring countries has a long and varied history The Iranian revolution of 1978 the collapse of the Soviet Union in 1991 and the ongoing conflict in Afghanistan since 2001 have left the area in a state of flux This volume gives a better picture about what is official and explicit what is not official but implicit or general practice and what the likely future developments might be It is very clear that multilingualism whether it involves Persian Russian or English in addition to other languages not only has long been a part of the scene but will probably continue to be so

nature of syntactic change **Ergativity in German** Günther Grewendorf, 2012-10-25 The architecture of the human language faculty has been one of the main foci of the linguistic research of the last half century This branch of linguistics broadly known as Generative Grammar is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the language organ The series comprises high quality monographs and collected volumes that address such issues The topics in this series range from phonology to semantics from syntax to information structure from mathematical linguistics to studies of the lexicon **The Algonquian Inverse** Will Oxford, 2023-11-28 This book serves as a definitive reference for the inverse morphology of the Algonquian languages which has attracted much attention in typological and theoretical linguistics Will Oxford describes the patterning of inverse morphology across the Algonquian family and presents a framework for understanding the structure and function of the Algonquian inverse that is empirically driven and typologically grounded He presents data from all documented Algonquian languages and considers not only the morphology of the inverse construction but also its syntax and pragmatics giving equal weight to diachronic typological functional and formal perspectives From the integration of these perspectives a simple and coherent understanding of the nature of the inverse emerges The key proposal is that the inverse is deep in some contexts and shallow in others In interactions between two third persons the inverse is a deep patient voice construction that inverts the canonical morphology syntax and pragmatics of a transitive clause In interactions between a third person and a first or second person the inverse is a shallow hierarchical agreement pattern implemented through a spurious use of patient voice morphology inverting the canonical morphology of a transitive clause but having no effect on syntax or pragmatics This split analysis which reflects the likely diachronic development of the Algonquian inverse is argued to have various benefits including the resolution of a longstanding controversy over the syntactic status of the inverse **Voice and Mood (Essentials of Biblical Greek Grammar)** David L. Mathewson, 2021-10-26 A recognized expert in Greek grammar examines two features of the Greek verb voice and mood Drawing on his years of teaching experience at a leading seminary David Mathewson examines these two important topics in Greek grammar in light of modern linguistics and offers fresh insights The book is illustrated with examples from the Greek New Testament making it an ideal textbook for the intermediate Greek classroom This is the first volume in a new series on Greek grammar edited by Stanley E Porter **The Iranian Languages** Gernot Windfuhr, 2009 The Iranian languages form the major eastern branch of the Indo European group of languages itself part of the larger Indo Iranian family Estimated to have between 150 and 200 million native speakers the Iranian languages constitute one of the world's major language families This comprehensive volume offers a detailed overview of the principle languages which make up this group Old Iranian Middle Iranian and New Iranian The Iranian Languages is divided into fifteen chapters The introductory chapters by the editor present a general overview and a detailed discussion of the linguistic typology of Iranian The individual chapters which follow are written by leading experts in

the field These provide the reader with concise non technical descriptions of a range of Iranian languages Each chapter follows the same pattern and sequence of topics taking the reader through the significant features not only of phonology and morphology but also of syntax from phrase level to complex sentences and pragmatics Ample examples on all levels are provided with detailed annotation for the non specialist reader In addition each chapter covers lexis sociolinguistic and typological issues and concludes with annotated sample texts This unique resource is the ideal companion for undergraduate and postgraduate students of linguistics and language It will also be of interest to researchers or anyone with an interest in historical linguistics linguistics anthropology and language development Gernot Windfuhr is Professor of Iranian Studies at the University of Michigan he has published widely on Persian and Iranian languages and linguistics and related languages as well as on other aspects of Iranian culture including Persian literature and Pre Islamic Iranian religions

Deconstructing Ergativity Maria Polinsky,2016-04-01 Nominative accusative and ergative are two common alignment types found across languages In the former type the subject of an intransitive verb and the subject of a transitive verb are expressed the same way and differently from the object of a transitive In ergative languages the subject of an intransitive and the object of a transitive appear in the same form the absolutive and the transitive subject has a special ergative form Ergative languages often follow very different patterns thus evading a uniform description and analysis A simple explanation for that has to do with the idea that ergative languages

much as their nominative accusative counterparts do not form a uniform class In this book Maria Polinsky argues that ergative languages instantiate two main types the one where the ergative subject is a prepositional phrase PP ergatives and the one with a noun phrase ergative Each type is internally consistent and is characterized by a set of well defined properties The book begins with an analysis of syntactic ergativity which as Polinsky argues is a manifestation of the PP ergative type Polinsky discusses diagnostic properties that define PPs in general and then goes to show that a subset of ergative expressions fit the profile of PPs Several alternative analyses have been proposed to account for syntactic ergativity the book presents and outlines these analyses and offers further considerations in support of the PP ergativity approach The book then discusses the second type DP ergative languages and traces the diachronic connection between the two types The book includes two chapters illustrating paradigm PP ergative and DP ergative languages Tongan and Tsez The data used in these descriptions come from Polinsky s original fieldwork hence presenting new empirical facts from both languages
