**Submarine Detection from Space** Hung P. Nguyen,1993 Bulletin of the Atomic Scientists ,1994-09 **Bulletin of the Atomic Scientists** ,1994-09 The American Bibliography of Slavic and East European Studies Patt Leonard,Rebecca Routh,2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union Organised by discipline it covers the arts humanities social sciences life sciences and technology *Cold War Submarines* Norman Polmar,Kenneth J. Moore,2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence Professional Journal of the United States Army ,1994 **A Tale of Two Navies** Anthony R Wells,2017-01-15 A Tale of Two Navies is an analysis of the unique relationship between the United States Navy and the Royal Navy from 1960 to present This loosely chronological study examines the histories strategies operations technology and intelligence activities of both navies The special intelligence relationship is highlighted by unique knowledge and insights into the workings of U S and British intelligence Bringing his extensive experience in both navies to bear Anthony Wells provides a revealing look at the importance of naval thinking how it impacts not only every level of naval activity but also national defense as a whole A Tale of Two Navies probes selective key themes and offers a discourse between the author and readers Throughout Wells challenges his reader to consider how the U S and the U K can best collaborate to advance their common strategic interests This insightful look at the special relationship is especially relevant given emerging and increasing threats from China Russia and radical Islamist terror organizations Quarterly Review of Military Literature ,1994 **The Militarization and Weaponization of Space** Matthew Mowthorpe,2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In The Militarization and Weaponization of Space Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People's Republic of China from the Cold War

period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics     The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual Ron Martini, 2005 Submariners are a tight knit group of men bound together by training and experience and with a language all their own That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal     **Nuclear Designs** Bruce Larkin, 2018-04-17 Global politics has changed with unaccustomed swiftness since the end of the Cold War Eastern Europe is free the Soviet Union has broken up China presses free market economic reform and the United States and Russia have declared a joint commitment to end nuclear war The force of these changes has created a new agenda for global politics and security policy This does not mean that nuclear weapons have lost their centrality Nuclear development programs continue in the major holders of advanced weapons In Israel Pakistan India North Korea Iraq and Iran nuclear intentions are subject to widespread speculation and scrutiny Negotiations for renewal of the Nuclear Non Proliferation Treaty remind us that the treaty requires serious efforts to abolish nuclear weapons Nuclear Choices points out that the Cold War's end has not banished mistrust Instead it has opened the door to frank conversation about the usefulness of force and the need to address common fears States now face a global choice among alternative nuclear futures If they desire to avoid runaway nuclear development the choices come down to three the status quo disengagement or abolition Larkin argues that if they chose the status quo they elect a world in which only terror and self restraint keep devastation at bay a world in which instant destruction is possible This study focuses on the nuclear weapons programs of Great Britain China and France because they may be less familiar to students of international affairs Each of these countries has developed a substantial nuclear capability that could decisively shape the result of coming global nuclear decisions Larkin concludes that these three minipowers could conclude that nuclearism serves their interests refuse disengagement and encourage proliferation If they are prepared to abandon nuclearism they have tremendous political leverage on Russia the United States and also on undeclared and aspiring nuclear weapons states For now only the United Kingdom France and China maintain sufficient warhead inventories and production capabilities to have strong effects on how the United States and Russia view their own strategic capabilities Nuclear Choices asserts that governments politics and parties today do not know how to guarantee themselves against weapons of mass destruction They must either acquire the political and social means to achieve such guarantees or accept a world in which

nuclearism will continue to cast its shadow over all aspects of nation building It will be of interest to political scientists policymakers military analysts and those interested in the nuclear issue     Admiral Gorshkov Norman C Polmar, Thomas A Brooks, 2019-03-15 Admiral of the Fleet of the Soviet Union Sergei G Gorshkov was the product of a tradition unlike those of his Western contemporaries He had a unique background of revolution civil war world wars and the forceful implementation of an all controlling communist dictatorship Out of this background of violence and overwhelming transformation came a man with a vivid appreciation of the role and value of navies but with his own unique ideas about the kind of navy that the Soviet Union required and the role that navy should play in Soviet military and national strategy Western naval observers have persisted in attempting to define Admiral Gorshkov in Western naval terms Many of these observers have been baffled when they found that the man and his actions simply did not fit conventional narratives This book lays out the tradition background experiences and thinking of the man as they relate to the development of the Soviet Navy that Gorshkov commanded for almost three decades and that was able to directly challenge the maritime dominance of the United States a traditional sea power His influence persists to this day as the Russian Navy that is at sea in the twenty first century is to a significant degree based on the fleet that Admiral Gorshkov built     *Military Review* ,1994     *Bulletin of the Atomic Scientists* ,2001     *Hot Straight and Normal* Ron Martini,2001 *Hot Straight and Normal* is a submarine bibliography with over 6000 references to books videos articles and Internet sources It is designed to assist researchers historians students teachers collectors and others with an interest in submarines their history construction and use in wars worldwide It s unique format of listing the books by title will assist the researcher and casual reader alike in finding or searching for familiar words and subjects Fiction book titles are also included Each listing contains title author date published publisher page count ISBN number and other informative descriptions if known This is the only submarine bibliography currently in publication The article index includes all articles in all issues of Naval Submarine League s Submarine Review and Naval Institute s Naval Proceedings magazine There are Web sites and other Internet sources listed and even information on obtaining more information through the Freedom of Information Act Also included is how to find materials inside government archives Collected and edited by a former U S submariner and member of U S Submarine Veterans Inc     *Seapower and Space* Norman Friedman,2000 For decades navies have been major sponsors of space developments for the purposes of secure communications and precise navigation without satellite navigation a submarine based deterrent force would have been impossible and the accuracy of the Tomahawk cruise missile in the Gulf War was entirely dependent on such technology This book chronicles these developments describing the systems themselves and concluding with an analysis of future possibilities     *Air University Library Index to Military Periodicals* ,1995     *The Journal of Military History* ,1994     World At The Crossroads: New Conflicts New Solutions A - Proceedings Of The 43rd Pugwash Conference On Science And World Affairs Joseph Rotblat,1994-11-08 Photonics and nanotechnology are popular emerging fields of technology This proceedings

volume contains over 12 selected papers from the International Workshop and Conference on Photonics and Nanotechnology ICPN 2007 held in Pattaya Thailand from December 16 18 2007 The papers cover a wide range of topics from optical and nonlinear optical physics to nanoelectronics      **Disarmament** ,1994
